31 A Certain Kind of Stance: Friends’ Central’s Enduring Passion for Teaching
Good teachers change lives. For this issue, we talked to a sampling of former faculty, alums, current faculty, and students to learn more about why they’ve chosen to teach.

Headmaster’s Note

Dear Friends,

The focus of this edition of Directions is teaching at and beyond Friends’ Central. The articles within feature current faculty Lou DelSoldo, Alexa Dunnington ’98, Jim Davis and former faculty members Harvey Zendt and Florence Jackson. In addition, there are articles on alumni/ae in the teaching profession: Matthew Baird ’80, Sidney Bridges ’79, Mary Alexander Cole-Wood ’52, and Anne Ross ’94. Introducing those feature articles is an excellent essay by our Director of Communications, Rebecca Anderson. It is most fitting that Rebecca has devoted this issue to what lies at the center of the Friends’ Central experience.

It pleases me to note that the photo of me above is more informal than the one you normally see in Directions. Rebecca suggested the use of this photo because it captures me in a more happy moment of teaching Greek to a wonderful group of seniors. A lot of my work as Headmaster pulls me away from the very things that drew me to this profession in the first place, an interest in young people and a love of teaching. The opportunity to teach eager and interesting Friends’ Central students helps me stay in touch in a real way with this generation of students and again with the activity that has been at the heart of the Friends’ Central experience.

I hope you enjoy this issue.

Sincerely:

David M. Felsen
Headmaster

Editor's Note

Dear Friends:

I'll never forget the thrill of my first experience as a teacher. I was five; my rapt student, my sister, was three. The lesson was geography, and equipped with only a box of crayons and our white playroom wall, I brought that lesson to life. I outlined the states in different colors; I filled in mountains, lakes, and forests. I sketched tall buildings for the cities and silos for farms. It was a dazzling performance that my mother utterly failed to appreciate and I was ordered never to repeat.

But I did go on to teach—literature and writing, not geography, to much older students—and to use a blackboard and chalk for my notes. I remember that the energy it took to engage my students sometimes made me feel as if I stood on the other side of a thick, impenetrable wall—maybe even a one-way mirror. At other times, the spark of a true connection, or the hum that accompanied an unexpected insight, were incomparably thrilling. But no other teaching moment was as effortless as that first one!

The years I spent teaching, as well as my own experiences as a student, have left me with a deep and abiding appreciation for the commitment—both personal and professional—that teachers make. There are few more demanding, more rewarding, and more important jobs than that of being a teacher. It is true: good teachers can change lives.

This issue of Directions is focused on teachers—the pulse of any strong academic institution. The work of putting it together has provided me with a very thorough introduction to the past, present, and future of Friends' Central. Throughout it all, I have been most struck by two things: the instinct for conversation, reciprocity, and attentiveness that characterizes our faculty and alumni/ae, and the abundance of intellectual and creative energy that defines our community. I only wish I had more pages to fill!

It has also been a pleasure to keep on top of all the activity on our campuses. This fall has been full and rich. There have been walls covered with art, rooms full of music, classes collaborating on lessons, younger children working with older children, athletic championships, and national academic recognition. I hope that as you read this issue you will feel the vitality of our school. It is a privilege to be a part of this community.

Sincerely,

Rebecca H. Anderson
Director of Communications
George Elser is honored and excited to serve on the Board. "Being on the Board is a way to thank the School for inspiring our children, C.E. '04 and Matthew '07, to be intellectually curious and to think independently while at the same time teaching them to write well. I especially look forward to serving on the School Life Committee. My particular interest is in cultivating an atmosphere of intellectual risk-taking where students will encourage each other to explore various ideas and be willing to question their own thinking as well as that of others."

George and his wife, Angela Scully, are the parents of Clara Elser '04 and Matthew Elser '07. George is a member of the Radnor Friends' Meeting and serves on their Finance Committee. He practices equine and real estate law in Wayne, PA, serves on the Executive Committee of the Jenkins Arboretum, and is President of the Tredyffrin Public Libraries.

Michael Kelly is a 1975 graduate of The Johns Hopkins University and earned his law degree from Villanova University School of Law in 1978. He was previously general counsel of the Anmark Corporation, but in recent years he has devoted himself to work in the non-profit sector. Michael served as a volunteer mentor in the Sponsor-a-Scholar Program of Philadelphia Futures, a non-profit organization committed to helping Philadelphia's high school students gain admittance to and succeed in college. He was chair of the board of the Balch Institute before it was absorbed by the Pennsylvania Historical Society, and he currently serves on the boards of Singing City and Friends' School Haverford. He states, "I was tremendously honored when David Felsen asked me to consider joining the Friends' Central Board of Trustees. I am a great admirer of David, and I also am impressed by the dedication and expertise of the Friends' Central staff and faculty. The School's commitment to Quaker values and academic excellence is very important to me. I look forward to helping strengthen the School's resources to sustain it in the future."

Michael and his wife, Joan Mazzotti, are the parents of Andrew Kelly '09.

Kaye Edwards, associate professor of general programs at Haverford College, is currently on sabbatical leave. She will attend her first Friends' Central Board meeting in February. We look forward to hearing more from her.

Louise Tritton has completed her term of service on the Board where, among many contributions, she provided excellent leadership of the School Life Committee. She is the mother of Christi Tritton '01. "Over the past eight years," she says, "I have watched the Board, faculty, staff, and students of Friends' Central School deepen their sense of Quaker values while searching for and finding creative, contemporary ways to express them. This is the hallmark of Quaker education at its best—may it ever be so."
Grace Tarves '08 performed with the Philadelphia Orchestra during a Family Concert celebrating the 100th birthday of composer Dmitri Shostakovich. Grace was cast as a Russian teenager, Katya, in Those In The Center, a short play that was performed with Shostakovich's Symphony No. 9. She shared the stage with two other actors and music animateur, Tom Cabaniss. Rossen Milanov conducted the orchestra at the concert. Grace is no stranger to the stage. She spends her summers performing at Upper Darby Summer Stage, and here at Friends' Central she plays clarinet with the orchestra and sings in the a cappella group and with Triple Trio. Grace plans to study Musical Theater in college and hopes to become a professional actress.

Julia Pearlman '06, Ryan Levan '06, Erica Kivitz '07, and Natalie Kitroeff '07 were all named Academic All-Americans, outstanding lacrosse players who also distinguished themselves academically. Colin Yarnell '08 was recognized as an Academic All-American gymnast. Colin also competed at Regional Championships in New York in both 2005 and 2006 where he won a gold medal on the pommel horse and a bronze medal for his floor exercise.

Frances Kreimer '01 is in Cairo, Egypt working for AMERA (Africa and Middle East Refugee Assistance), an organization dedicated to ensuring that refugees in Africa and the Middle East have access to free legal aid in their host countries. Recently she has worked with several Ethiopian clients who were arrested during the protests in 2005.

In May, the Make-A-Wish Foundation honored Julia Feinberg '06 with a wish. The Foundation grants the wishes of children with life-threatening medical conditions. After months of contemplating her wish, Julia, who has Spinal Muscular Atrophy, decided she wanted to help others rather than accept something for herself, so she asked for the monetary equivalent of her wish to be donated to the Firelight Foundation. "I’ve always been passionate about confronting the AIDS epidemic in Africa," Julia said. "My teacher (Joel Dankoff) did an assembly that included a presentation of the Firelight Foundation that caught my interest. It is a grass roots organization that provides grants for the community to work together to serve children affected by HIV/AIDS in Africa." To honor Julia’s wish, Make-A-Wish Foundation sent a check for $6,500 made payable to Firelight Foundation on Julia’s behalf.

Jennifer Shusterman '06 spent six weeks in Israel this summer as part of a new program called Legacy Heritage Internship for Young Scientists (LHIYS). She was one of thirty students throughout the U.S. and Canada who were selected for the unique program that recognizes “brilliant Jewish high school juniors and seniors with demonstrated scientific aptitude and achievement.” The internship participants worked with eminent Israeli scientists in the laboratories of the prestigious Hebrew University. They also toured Israel and learned more about their Jewish heritage. Upon returning to the U.S., the participants are expected to implement social action projects that will allow them to share what they learned.

When the Friends' Central faculty gathered at the start of the school year, they gave their colleague, Jean Taranta, Lower School librarian, a standing ovation for her thirty-five years of service to the school. Jean began her career here as a third grade teacher before moving to the library in 1980. This fall she took a short break from helping the children at Friends' Central to spend a week in New Orleans working with ongoing victims of Katrina. Jean served as the official cook for a group of fourteen volunteers. She also helped in the local community center and in the homes the volunteers were working to rebuild.

William Hoekheimer '09 received the 2006 Calvert Award from The American Entomological Society. This award is presented annually to a young scientist from the Delaware Valley who has conducted a
noteworthy insect-related project. Will conducted his project, *PCR Amplification of mDNA from a Mexican Geometrine Moth Species*, with the help of Upper School science teacher, John Gruber. The project looks at how two species diverge in the evolutionary process. The project is still a work-in-progress, but so far Will's findings lead to the notion that analyzing DNA is much more accurate than other methods when comparing and contrasting species growth and development. Will is interested in pursuing microbiology further and envisions himself as a scientist in the future.

This fall, the Lower School Service Committee has offered a wide variety of opportunities in which Friends' Central for ElderNet of Lower Merion; a Warmth in Winter Collection of hats, mittens, and scarves for children in the Philadelphia shelter system; and Knit-In at City Hall. There will be more opportunities to participate all year.

Junior Isabel Friedman '08 was so intrigued by alumna Sarah Frank Connor's '76 discussion at Friends' Central's annual Career Day that she introduced herself afterwards and arranged for a summer internship at The Echo Design Group where Sarah is a senior design manager. A high point for Isabel was helping with the layout of a scarf commissioned by a museum to honor a special bird exhibit.

It's been a busy fall season for Friends' Central artists. Melanie Fischer '87 and Sonya Sklaroff '88 recently had openings in Brooklyn and San Francisco. Upper School art teacher, Peter Seidel, had an exhibition of his new work, *Cleaner Paintings*, in Centennial Hall at the Haverford School.

February 26th through March 16th, 2007, Friends' Central will be hosting the annual *Inter-School Art Exhibition*, a selection of the best in visual arts made by Upper School students from Agnes Irwin, Baldwin, Episcopal, Haverford, Shipley, and Friends' Central. There will be a reception that is open to the public on Friday, March 2nd from 4-6 p.m.

Aaliyah Powell '05 was awarded the first Dorothy Willits Hallowell Nursing Scholarship from the Anna T. Jeanes Foundation. The scholarship is for young Friends or graduates of Friends' schools to pursue careers in nursing. Aaliyah is attending Temple University's School of Nursing.

Friends' Central Lower School students raised more than $7,100 in the *76em Read for Ronald Program*, more than any other participating school. The students collected pledges and kept track of the number of minutes they read in one month. The proceeds go to help support the Philadelphia Ronald McDonald House.

Lower School children and their families could participate. Some of their projects included: a sneaker drive to benefit One World Running (an international program that provides running shoes to those in need) and Nike Reuse-A-Shoe (a program that recycles old shoes to construct new athletic courts, equipment, and playground surfaces); a Baggie Saturday at the SHARE Warehouse to help families in need obtain groceries; Thanksgiving Baskets.
Chris Green ’10, Dan Jacobson ’10, and Lizzie McMorris ’10 won first place in their category at the Montgomery County Science Research Competition 2006. Their poster was titled “Ability of Different Soils to Control Water Retention and Water Quality.” They worked with Middle School science teacher, Doug Ross. Last year, Ross and his eighth grade students won the Environmental Community Service Award and a check for $5,000. This award recognizes schools that support the community with programs to improve the environment. The Friends’ Central students had worked in Morris Park at 66th and City Avenue. They beautified the park by removing harmful weeds, performing erosion control, and replanting the soil with new plants. Ross used the money as a grant toward enhancing environmental studies, purchasing new plants for the School nursery, and restoring water testing equipment.

Nathaniel Kahn, director of the 2003 Oscar-nominated film My Architect about his father, architect Louis Kahn, came to Friends’ Central with his half-sister and Friends’ Central parent Alexandra Tyng and her son, Kahn’s grandson, Julian Kantor ’07.

Alumna Linda Hawkins Costigan ’86 visited in October to screen her new documentary, The World According to Sesame Street.

Two award-winning authors have spoken at Friends’ Central recently: young adult fiction writer Margaret Peterson Haddix, author of The Shadow Children series, Running Out of Time, and Double Identity, and two-time Caldecott winner David Weisner, author of Tuesday, Flotsam, and Night of the Gargoyles.

The American Council of Teachers of Foreign Languages lists LinguaZone.com as one of the top new things to watch for online for language teachers.

LinguaZone.com is a new language website created by Colin Angevine ’05 and Middle School language teacher, Margaret Somerville Roberts ’83 where teachers can customize games for their students using their own vocabulary lists and culture questions. The program grew out of the Prima Lingua course that Roberts created and oversees here at Friends’ Central and began with Colin’s work on his senior project. It is now used in over 210 schools in 31 states and 6 other countries by language teachers from kindergarten through college levels. Visit the site at http://www.linguazone.com.

When Alex Kleiman ’11 and his family traveled to Israel in 2005, a visit to an Ethiopian absorption center had such an effect on him that he returned to the States and created a unique Bar Mitzvah project: a 22-mile bike ride to raise funds to aid Ethiopian Jews. Alex chose 22 miles he said, “in honor of the 22,000 Ethiopian Jews who have immigrated to Israel.” He was accompanied by his father and several friends. Altogether the project raised $3,774, all of which he donated to Operation Promise, a UJC campaign to help Ethiopian Jews and elderly Jews in the former Soviet Union. The money Alex raised was matched by Kenneth Kaiserman, a trustee of the Keyv and Hortense Kaiserman Foundation.

College Counselor Carrie Brodsky participated in her third Habitat for Humanity Global Village build in Africa this summer. Her first trip, to

Leah Hawkesworth ’12, Andrew Nemroff ’12, Giulietta Schoenfeld ’12, Author Margaret Peterson Haddix, Benjamin Yahalom ’11, Allogra Armstrong ’19

Carrie Brodsky in Uganda

Malawi in the summer of 2004, was partially funded by a Clayton Farraday summer stipend. In 2005, she traveled to Zambia and this past summer to Uganda. The 2006 build was hosted by the Karikamu-Luwero Affiliate in Uganda. Carrie’s group built two homes, each for single mothers with young children.
In May, the Friends’ Central Quaker Life Group organized an exhibition in observance of Memorial Day outside the cafeteria, followed by a potluck picnic to honor the sacrifice of men and women who gave their lives to mourn the damage of war and the suffering of all it affects, and to honor those who have given their lives in the nonviolent struggle for justice, freedom, and peace. The display featured information about wars the United States participated in, some personal accounts of war and nonviolent action, information on the Quaker peace testimony, information about the peace witness in other religious traditions, information about conscientious objection, and information about literature on nonviolence. This year’s Quaker Life Group is off to a strong start. They met on November 15th to hear from four faculty members in the School.

Daniel Colon ’96 won a Fulbright Scholarship to conduct dissertation research in Santiago, Chile. Colon earned a B.A. from Tufts University and then returned to Friends’ Central to teach Spanish from 2001–2003. He is currently pursuing a Ph.D. in Latin American and Brazilian Literature at the University of Notre Dame. His dissertation will offer a post-Cold War re-reading of the political poetry of Chilean Nobel Laureate Pablo Neruda. In Santiago, Colon will be researching archives containing manuscripts and letter at the Pablo Neruda Foundation and interviewing writers and politicians. For more from Colon, please read “Notes From Friends.”

Gabe Bloomfield ’07 was a semi-finalist in the Young Playwrights’ Inc. national competition this summer for his play, “Snow is Falling.” Gabe will be writing and directing a new play for the ninth and tenth grades to premiere on May 25th, 2007.

Patrick Carrenard ’01 is the 2006-2007 recipient of the Joey Pozzuolo Memorial Scholarship at Temple Law School. The scholarship was established by Joey’s family to benefit a Friends’ Central graduate or faculty member attending Temple Law School. There have been three recipients so far, Patrick, Catherine Gowa ’96, and former faculty member, Chesley Lightsy.

The seventh grade enjoyed their annual trip to Echo Hill, an outdoor school on the Eastern Shore of the Chesapeake Bay, in September. The camping trip, organized by Middle School teacher Angelo Valle, introduces the seventh grade to the focus of their science curriculum—living in the natural world. The activities include ecology, boating, and orienteering and are designed to encourage the class to work together even as each member tests his or her individual strength and creativity.

Thirty-four Friends’ Central students participated in Le Grand Concours, or National French Contest, a 60-minute national examination, designed, written, financed, and disseminated by the members of the American Association of Teachers of French. Its purpose is to help stimulate further interest in the teaching and learning of French and to help identify and reward achievement on the part of both students and teachers. Over 100,000 students participate nationwide.

From the Admission Office

Barbara Behar, Director of Admission and Financial Aid

Every year, the Admission Office staff meets and assesses prospective students in an effort to identify those who we think would benefit from and contribute to Friends' Central's challenging curriculum and creative environment. Even though we were told by demographers that this year there would be fewer school-age students from whom to choose, once again our applicant pool was strong.

The Admission Office is delighted to report that this year we have added 150 very talented and engaging students to our community. They come to FCS from nursery, public, and independent schools from all over the metropolitan area, from seven different states, and three different countries. They bring a variety of talents and experiences to Friends' Central and enrich our community through the diversity of their unique backgrounds and perspectives. We welcome them and look forward to getting to know them and their families as the year progresses.

From the College Counseling Office

Grant Calder, Director of College Counseling

People tend to focus on class size when discussing the advantages of an independent school education. Smaller classes are a plus, no question, and the "small is better" advantage is particularly pronounced in the area of college counseling. Colleagues of mine working in public high schools, even those in which eighty percent or more of the graduates go on to attend four year colleges, are typically responsible for three, four, even five times the number of students that we are here at Friends' Central. What's more, they must act as the primary advisor, the "guidance counselor," for each one of their advisees during their entire four years in high school. At Friends' Central, every student has a faculty advisor, each grade has a dean, and there is a Dean of Students for the Upper School. This powerful combination of faculty and administrative support for our students leaves the college counselors free to devote their time entirely to college counseling. We have time to sit down with all the students in a junior or senior class, and with their parents, as often as needed. We have time to meet with the seventy or so college representatives who come to visit Friends' Central each fall. We have time to visit colleges and universities ourselves (we average about fifteen visits per year per counselor). We can attend meetings of our local Delaware Valley independent school group of colleagues, as well as state and national gatherings of college admissions officers and high school counselors. We have time to be advocates for our students throughout the college admissions process. And we make time for the many of them who return to visit after they graduate to catch up with them and hear their thoughts about the colleges they are attending. It gives us great pleasure to report that the feedback is positive; overwhelmingly, our recent graduates feel they have chosen schools that support their academic and extracurricular interests.

Awards

CLAYTON FARRADAY MASTERSHIP SUMMER STIPEND AWARD RECIPIENTS 2006

Keith Bradburd (Director of Boys’ Athletics)
Keith participated in the People to People International Sports Ambassador Program. He coached a youth team in the Haarlem Cup and worked with several coaches from the Dutch national team.

Jebb Chagan (Middle School Social Studies)
Jebb travelled south to visit the Trail to Freedom, Civil War battlefields, Vicksburg, Andersonville, and several southern plantations. Jebb also spent time helping with recovery efforts in New Orleans.

Kelley Graham (Upper School History)
Kelley worked on a book about the history of shopping. She traveled to the Hagley Museum in Wilmington for research.

Terry Guerin (Upper School Drama)
Terry participated in a workshop at the Folger Shakespeare Library in Washington, D.C.

Mary Gregg (Second Grade)
Mary traveled to Spain to learn more about the Spanish culture and language, in particular the Andalusian culture.

Kim Parris (Lower School Art)
Kim traveled to Abiquiu, New Mexico where she took a ceramic course at the Ghost Ranch Conference Center.

Chris Ramsey (Fourth Grade)
Chris traveled to Guatemala to study Spanish at the Jabel Tinamit School, as well as at a school in Antigua. Chris also visited her son, Ian ’03, while in Guatemala and examined the woods and rain forests of Central America in preparation for the Lower School’s thematic study.

Jim Rosengarten (Upper School History & English)
Jim traveled to Colorado to study the Mennonite religion, the history of the Rocky Mountain Mennonite Camp, and the Mennonite ethic of service and non-violence.

Peter Seidel (Upper School Art)
Peter traveled to Abiquiu, New Mexico to take painting courses at the Ghost Ranch Conference Center.

FANNIE COX HENDRIE SUMMER STIPEND AWARD RECIPIENTS 2006

Keith Buckingham (Physics)
Keith traveled to California State University, Bakersfield and worked with Art Department Chair, Michael Heivilo to develop a course of study in the area of Chemistry and the Physics of Color.

Catherine Dawson (First Grade)
Catherine attended the annual National Educational Computing Conference held at the San Diego Convention Center.

John Gruber (Biology)
John visited the Lepidoptera butterfly collections of the Carnegie Museum of Natural History in Pittsburgh, PA.

Chris Guides (Middle School Science)
Chris purchased ArcIMS software to be used as a tree database for the FCS Arboretum as well as for the general public.

Gayle Harmer (Lower School Math)
Gayle purchased math resources for Lower School faculty members.

Doug Ross (Middle School Science)
Doug visited the Atlantic Forest of Brazil and other ecotourism sites to help create a website on ecosystems. Doug traveled to Curitaba to observe their practices and talk to officials there.

Friends’ Central Congratulates Our 2006 National Merit and National Achievement Scholarship Students!

Friends’ Central is delighted to announce that the National Merit Program has recognized nineteen seniors as Semifinalists and Commended students. Over the last five years, twenty-two percent of Friends’ Central Seniors have earned these distinctions.

This year, Friends’ Central had fourteen Semifinalists: Josh Abel, Noor Beckwith, Gabe Bloomfield, Max Branzburg, Justin Chen, Julian Kantor, Natalie Kitroeff, Susanna Kurnick, Ben Loughin, Max Nisen, Eric Nisenbaum, Elena Pereira, Nate Reider, and Mike Weiss.

Five students are Commended: Joshua Aichenbaum, Jonathan Milestone, Luke Pryor, David Siegel, and Emily Spooner.

In the National Achievement Program, Noor Beckwith is a Semifinalist and Aurora Wardlaw is an Outstanding Participant.

Upper School Awards

LANGUAGE DEPARTMENT
The Foreign Language Department recognizes juniors and seniors who have exhibited exceptional achievement on an advanced level and enthusiasm in their foreign language studies.
Robert Golan-Vilella ’06,
Jacob Senker ’06, Lise Rahdert ’06

HISTORY PRIZE PAPER
Juniors in their American History classes undertake independent, primary source-based research projects in the second half of the year. They begin the topic selection process in January, gather and begin to study their sources in February, present "work in progress reports" to their peers in March, submit rough drafts in April, and turn in their completed essays in May. The history department takes this opportunity to highlight two of these works and to recognize the time and energy devoted to all of their projects by members of this senior class when they were juniors.
Carly Dreyfus ’06, Mark Simon ’06

MATHEMATICS
The Mathematical Association of America and Friends’ Central School presents the mathematical award. Selection of the student receiving the award is based on the scores earned on the Annual American High School Mathematics Examination.
Robert Golan-Vilella ’06,
Adam Valen Levinson ’06

SCIENCE
The faculty of the Science Department presents this award to senior students who have demonstrated excellence in scientific scholarship and achievement, and have shown breadth of study across the science disciplines.
Millan Abinader ’06, Jennifer Robbins ’06, Mark Simon ’06

THE POETS AND
PLAYWRIGHTS PRIZE
This award, sponsored by the English department, recognizes the work of poets and dramatists in our student community.
Alexander Avelson ’06
THE RAMSEY AWARD FOR PROSE
Given by Mary Ann Ramsey ’41, a writer, editor, and public relations director, this award recognizes a writer for a piece of fiction or non-fiction prose.
Timothy Chawaga ’06

BENJAMIN V. OGDEN AWARD
Given by Mrs. Andrew Joseph Newman, Jr., and the late Thomas B. Ogden ’45 in memory of their father Benjamin V. Ogden, Director of Friends’ Central Summer Day Camp for fifteen years and teacher of physical education in the Philadelphia Public School System. Mr. Ogden was concerned about developing future citizens who were aware of their spiritual, mental, and social responsibilities.
Millan AbiNader ’06, Galen Guindon ’06, Ryan Levan ’06, Benjamin Schutzman ’06

CALVIN RANKIN AWARD
Established for Calvin Rankin ’43, whose fine and sensitive spirit displayed itself in a love of great music, in a gift for discriminating writing, and in a character which combined gentleness with integrity.
Alexander Abelson ’06, Danielle Gershkoff ’06, Benjamin Gilman ’06, Noah Hecht ’06

LEOLA ADELAIDE SMITH MEMORIAL AWARD
Established in memory of Leola Adelaide Smith ’74 by her classmates and friends, this award is to be given annually to students who have an appreciation for cultural and intellectual pursuits and at the same time are sensitive to the beauty in nature as well as in people. Leola set an example for all of us—she possessed dignity, integrity, a desire to learn, a love of people, and a talent in music and art.
Selin Amado ’06, Matthew Miller ’06, Anna Pipes ’06, Aleeza Wachs ’06

MUSIC AWARD
The music award is given in recognition of loyalty, service, and contributions to the Music Department. The recipients demonstrated excellence in composition, performance and academic achievement.
Danielle Gershkoff ’06, Robert Golan-Vilella ’06, Matthew Miller ’06, Adam Valen Levinson ’06

ART AWARD
The Art Award is occasionally given to students who, throughout the course of their high school careers have demonstrated vision, intelligence, skill, and a love of image-making. They will have integrated their eyes, their minds, their hands, and their hearts.
Rebecca Harmer ’06

SUSAN DURNFORD SNIPES MEMORIAL AWARD
Given by the Upper School Faculty, in memory of Susan Durnford Snipes, in recognition of outstanding contributions to community service in the school.
Millan AbiNader ’06, Elizabeth Baron ’06, Lauren Engelmyer ’06, Karen Lavi ’06, Mikayla Lytton ’06, Ivana Milić-Štrkalj ’06, Rachel Reed ’06, Dana Robinson ’06, Morgan Robinson ’06, Amy Thomas ’06, Aleeza Wachs ’06

JOHN H. McCOLLUM MEMORIAL AWARD
The Home & School Association recognizes graduating young women and young men representatives of the spirit John McCollum brought to the community of Friends’ Central School.
Dwight Dunston ’06, Amber Lee ’06, Julia Pearlman ’06, Jennifer Robbins ’06

FLORENCE JACKSON AWARD
For twenty-two years, Florence Jackson was the predominant figure in the area of girls’ athletics at Friends’ Central School. The Florence Jackson Award is given to that girl who, through her dedication to and love of sports, has shown the coaches the outstanding qualities of leadership, sportsmanship, and spirit, which Mrs. Jackson has sought to instill.
Karen Lavi ’06

DAVID KIRK MEMORIAL AWARD
David Kirk was an instrumental figure in the area of athletics at Friends’ Central. This award is given to a boy who, through his dedication to and love of sports, has shown his coaches the outstanding qualities of leadership, sportsmanship, and spirit which David Kirk has sought to instill.
Dwight Dunston ’06, Andrew Richardson ’06

OUTSTANDING SENIOR ATHLETE AWARD
The Outstanding Senior Athlete Award is presented to members of the graduating class, who have demonstrated outstanding skills in athletic competition as members of at least two Friends’ Central Varsity teams during their senior year. The criteria for the award include athletic achievement, leadership ability, and sportsmanship throughout their high school careers.
Julia Pearlman ’06, Galen Guindon ’06

EXECUTIVE AWARD
Awarded to a boy and girl in the Upper School who, by vote of students and faculty, represent the highest qualifications of school citizenship.
Karen Lavi ’06, Dwight Dunston ’06

The New Friends’ Central School Philosophy

Every ten years, independent schools undergo a very thorough review by the Pennsylvania Association of Independent Schools (PAIS). These reviews offer schools the opportunity to look inward and reflect on their goals, methods, and philosophy. In anticipation of our review, Friends’ Central examined and revised the School’s 1994 philosophy last spring. While no substantive changes were made, the new philosophy better captures Friends’ Central’s guiding principles and aspirations.

Since its establishment in 1845 by the Religious Society of Friends, Friends’ Central School, a coeducational, college preparatory day school for pre-kindergarten through twelfth grades, has been guided by Quaker testimonies of simplicity, peace, integrity, community, and equality. Underlying all facets of School life is the belief that “there is that of God in everyone.” Meeting for Worship is central, providing time for connections among members of the community and between individuals and their spiritual sources. Peaceful resolution of conflicts, seeking truth, and collaborative process are key aspects of a Friends’ Central education.

Friends’ Central offers rigorous and varied educational experiences in academics, the arts, and athletics, helping our students realize their potentials and achieve on the highest levels possible. We encourage trial and error, critical thinking and questioning, and intellectual courage in all areas of our curriculum. We strive to balance competence in using sophisticated technology with the richness of a humanistic education. Students’ individual interests are encouraged and supported while essential skills are carefully honed.

We intentionally seek a wide spectrum of diversity in our School community. We respect unreservedly that diversity and strive to enhance and support it. Diversity influences how we teach, learn, and communicate. It enriches the community and furthers the understanding that each human life is intrinsically valuable and interrelated, one with another.

We realize that our students have instant access to world events, and we help them generate a social conscience in their actions within the community as well as in the wider world. We want them to develop compassion for fellow human beings across national boundaries and to value the environment. Accordingly, there are many opportunities for service, where experiential learning provides us with the awareness that we, to whom much has been given, can make a difference both locally and globally.

We believe that a friendly, nurturing, and kind school environment fosters true scholarship and helps students develop strong ethical values. In a well-ordered community, adults model behavior for students and encourage inner discipline. In such an environment, it is our strong belief that students will grow into contributing, optimistic members of society who will have a positive impact on human life. ◆
Friends’ Central Welcomes New Faculty and Staff

Selected New Faculty Profiles

Laurie Schmitt is returning to Friends’ Central, where she taught history for seven years in the 1990s. During that time she also served as a grade dean and co-department chair. Laurie went on to teach history in Beirut and Sao Paolo and earn an international master's degree in peace and development. Laurie will be teaching world history (ninth grade) and international relations (eleventh and twelfth grades). Her daughter, Maggie, graduated from Friends’ Central in ’94.

Mark Dawson joins us to teach world history (ninth and tenth grades). Mark is a native of New Zealand where he taught for eight years, the last seven of them at Rutherford College (the equivalent of an American high school) in Auckland.

Cheryl Davis is returning to Friends’ Central as a second grade teacher after six years teaching at Germantown Friends’ School. She is a graduate of Tufts University and completed her master’s degree in education at the University of Pennsylvania when she was an intern teacher there.

READ DeSabato is an assistant teacher in the pre-kindergarten and also teaches computer to the kindergarten classes, where the kids know him as Mr. READ. He graduated from Friends’ Central in 2002 and from Cabrini College in 2006. He has been a counselor in the Trailblazer Camp and has taught and coached for Friends’ Central Aquatics.

Jason Polykoff ’02 returns to his alma mater as a Middle School teacher of mathematics, a soccer/basketball/baseball coach, and Sports Information Director. He attended, earned a B.A. in psychology with a minor in educational studies from Haverford College where he also played four years of varsity basketball and participated in various community service projects.

Melissa Rabena is teaching fifth grade social studies at Friends’ Central School. She has been teaching middle school children for the past few years at Annunciation B. V. M. School in Philadelphia, where she also coached and served as Athletic Director. Melissa earned her B.A. in education, her M.A. in educational leadership, and her teaching certification in social studies at Neumann College, where she graduated summa cum laude.
The trees were alive this fall at Friends’ Central’s Lower School, and the halls were filled with Robin Hood’s Merry Men, whispering pitch pines, talking rubber trees, and even a Lorax or two. Brightly colored vines curled around and illuminated the letters of the alphabet, painted clay birds and evergreen branches perched in the windowills, and when you peeked into the classrooms, you just might have thought you’d lost your way and stumbled into Pohl’s Hundred Acre Woods, the Adirondacks, or Tolkien’s enchanted Middle Earth. But the magic was all happening right here in Wynnewood. You were in the midst of Friends’ Central’s very innovative and original Fall Project.

Each year Friends’ Central’s Lower School follows an all-school, interactive, thematic curriculum that each teacher develops differently, using it as a starting point to work on the more traditional curriculum concerns of spelling, math, and history. This year’s theme was “Into the Woods,” and the topics teachers chose for their classrooms included: the Hobbit’s Mirkwood Forest, the Indonesian Rain Forest, the Pine Barrens, Little House in the Big Woods, the Guatemalan Jungle, and the forest in folktales. Science teachers identified the trees of Pennsylvania; art teachers covered the hallway walls with leaf rubbings and pictures of imaginary trees; the music teachers brought in different wood instruments; and the physical education teachers built a maypole.

In September, the faculty marks the kick-off of the Fall Project with an original play that showcases each classroom’s focus, lots of laughs, and even a flying whipped cream pie! After that, the activities and field-trips reflect the creativity and originality of our FCS faculty. Third grade teacher Jack Briggs used Sherwood Forest as the starting point for a social studies discus-
they took turns serving various tropical fruits. They learned a
tune to help them remember the layers in a rainforest, and they
filled their room with vines and hanging monkeys. Next door,
the pre-kindergarten children in Kristi Kallam’s and READ
DeSabato’s class studied Winnie the Pooh. They built Pooh’s tree
house, had a tea party to celebrate Pooh’s 100th birthday, and
made balloon sand bees to toss around with their project
buddies in third grade.

Second graders went to Pennsylvania Hospital to learn about
medicinal herbs; other classes visited the Morris Arboretum and
the Arboretum on the Upper School campus; there were plays
and performances; and all of the classrooms sent each other
“leaf notes”—messages written on leaf-shaped paper and secret-
ly delivered baskets outside each classroom. These notes are just
one example of how the Fall Project encourages the children to
connect with each other across grades and classrooms.

The Fall Projects began in the mid-1970s when the faculty
set out to enliven the months they spent reviewing material.
They also wanted to find a way to unify the School and gener-
ate opportunities for shared activities. In 1977 the program
catched fire when the faculty designed TERRA, an imaginary
planet, and each classroom became a different nation, with its
own language, literature, and culture. Since then the themes
have included such diverse topics as Flight, Islands, Latin
America, and Literary Places.

Assistant Principal Lou DeSoldo explains that for children
this young, “the thematic course of study is particularly valuable
because the limited focus it provides helps them build the cog-
nitive structure and skills they need to retain a wider range of
information.” It also teaches them to look for connections
across disciplines and helps develop their sense of belonging to
a larger community of learning. Teachers enjoy collaborating on

lesson plans and all-school assemblies, while students consciously
follow what is happening across the hall or upstairs.

At the end of each fall, the entire Lower School gathers for a
culminating event that features everyone’s special focus. This year
they created a giant, “enchanted friendship tree.” Each classroom
made something to represent their studies and fill the branches—
butflies, bees, hobbits, acorn dolls, red ants, characters from
Robin Hood. The tree covers one whole wall in the meeting
room and will stand all year as a colorful, vibrant testament to
the enduring power of the Fall Projects. More than anything else,
the children at Friends’ Central’s Lower School are learning that
school can stimulate their imaginations, test their creativity, and
form the basis for a community of friends.

Lower School faculty play
“Introduciendo Español”

This fall, Lower School introduced Spanish as a regular part of the curriculum. For the past three years, pre-kindergarten and kindergarten have had instruction in Spanish twice a week, and for awhile, a Spanish Club met after school for the older children. But now, Señorita Stephanie Storm pushes her cart full of books, picture placards, and puppets throughout the Lower School, visiting each classroom two to three times a week.

Many parents had asked for language instruction to begin in Lower School. When second grade teacher, Stephanie Storm came along, the program came together. Storm was born in Spain and lived in Colombia, Mexico, and Brazil as a child until she came to the United States for college. She speaks Spanish fluently and taught for ten years before coming to Friends’ Central in 2003. Perhaps most importantly, she is animated and energetic, and she loves children.

Storm believes very strongly in the value of instruction in foreign language because learning a foreign language is a natural way to expand horizons and help children develop appreciation for other cultures. Furthermore, “once a child is exposed to a second language,” Storm explains, “reading and writing in their own language come much more easily.” As for the School’s choice to teach Spanish, Storm points out that according to a recent article in the New York Times Magazine, fifteen percent of Americans are Hispanic. Friends’ Central students have the chance to study French and Latin in the Middle and Upper Schools, but as a general introduction, Spanish is a logical choice.

Storm’s approach to teaching is as lively as she is herself. In the pre-kindergarten classes, Storm plays lots of games, she sings songs, and she acts out stories with puppets. She even has a game in which each child is given a flyswatter and they race to “swat” the pictures that correspond to vocabulary words.

Storm does not abandon the games when she moves into an older grade, but she does spend more time working with concrete skills and building vocabulary. A recent fourth grade class began with counting. But instead of pointing to numbers on a chart, Storm threw out a purple rubber ball for the children to toss around and count out loud their catches. “My goal,” she says, “is to have fun. Whatever the kids can learn in the process is great, but this first year, the emphasis is on fun and getting past the sense that Spanish is foreign.”

So far, so good. Storm’s students call her “Fantástica Señorita,” and the other teachers are very complimentary of her contagious enthusiasm. For all concerned, the new Spanish curriculum is “excelente!”
These poems were written by fifth grader, Emma Dahle ’14, when she was in Ginger Fifer’s fourth grade class. This summer they were published in The Philadelphia Inquirer.

“Silence” earned first place in last year’s Gladwyne Library’s Junior Authors Contest, and “Imagine” was featured at a concert performed at the Ethical Society on November 4th and 5th.

Imagine

Imagining,
Your head filling with ideas,
Creating your own world,
Thinking about whatever you want,
All thoughts being molded into one,
So much crammed inside one space

Silence

Silence.
Deafening silence,
Communicating inside your head.
Not speaking, somehow sharing
Something with the whole world.
Thoughts, like a train moving through
Your head.
One thought passing and yet another
Slowly approaching.
Finally the train has left and
The silence,
The deafening silence ends.
Like a crowd in awe after a show,
And then they start to
Scream and clap.
That precious silence has gone
And you can talk.
But you will never forget
That deafening silence.

Looking Through a Window

Looking through a window,
At a world that needs more peace,
Looking at the mirror,
At a person who can make a difference,
Looking through a telescope,
At kids who need help,
Looking through glasses,
At a world that has just changed
Swimming Underwater in Room 15

Doug Ross’s Middle School science room has always been full of life and activity. This summer it gained even more color thanks to an exquisite mural by Friends’ Central’s own Frank Zhao ’09. Zhao is a talented young artist whose work has appeared around Friends’ Central several times already: in 2004 his pastel drawings graced the covers of the Middle School Yearbook, and in 2005 Doug Ross chose one of his landscapes for the cover of the Friends’ Environmental Education Network Conference’s publication, Sustainable Schools: A Look at Environmental Problems in Schools. This past summer, Frank’s art jumped off the page and into the classroom when he painted a mural around the carousel of Ross’s desk.

The project began when Frank called Ross to ask if he had any service projects going on in the summer. Zhao was looking to volunteer with Stream Watch or at the Tinicum Wildlife Preserve, both places he’d gone to with Ross before. But Ross immediately thought of the carousel around his desk, a plain white surface that stuck out into the room. “How about a mural,” he asked, and Zhao agreed. Zhao took his cues for a subject from the rest of Ross’s room where water, life, and turtles are the very evident, related themes. Ross has four species of turtles (seven total) as well as two Russian Tortoises that live in room 15, and his students spend much of the year studying water supplies—what makes them sustainable or not, and how their health affects animal, plant, and human life. So Zhao found a picture of turtles that he could adapt, and he set to work.

The mural ended up taking Zhao all summer to complete. First he pencil sketched outlines of the turtles’ bodies so that it would be easier to lay down color without hesitation. Normally, the second step when painting is to completely cover the canvas with a base of color; the final composition of a painting is built up from this first layer of paint, with fine shades blended along the way. But because of the size of Ross’s desk and the complex coloring of the turtles, Zhao needed to make sure that the base coat was precise. So he spent a lot of time mixing his paint in

order to create the right tones. Once the first layer of paint dried, Zhao began detailing the picture, adding colored scales, eyes, and a couple of fish.

Although Zhao and Ross are thrilled with the final result, the project ended up taking a lot more time than either of them had expected. It is by far the largest painting Zhao has ever done, and the most complicated without the guidance of a teacher. During most of the summer, there were day campers in the room who watched with fascination as the painting came together. Occasionally there were technical glitches—one Saturday, alone on campus, Zhao stepped out to use the restroom and inadvertently locked the door behind him. Just as he was about to give up, Mark Fifer appeared and gladly reopened Room 15. Toward the end of the project stretched on into August, Frank’s parents worried that it would interfere with their family vacation plans, but Frank was determined to get every stroke right.

When Ross and the rest of the school returned in September, they were amazed. The energy and beauty of Zhao’s painting fills room 15. Enormous turtles seem to swim right out from Ross’s desk and pull the students into their underwater world. The mural is electric and original, and it lends an unusual perspective to the Middle School science classroom.
A.C.E.—At Your Service

As of this fall, Friends’ Central Middle School students have an extra resource at their disposal—the Academic Center for Excellence, or A.C.E. as it is more commonly known. The idea for A.C.E. and its corresponding website grew out of Deb (Pelz) Fedder’s ’79 desire to reach more students than her work as a language skills teacher allowed. Since 1993, Fedder has taught a language skills class to the approximately thirty seventh and eighth grade students who choose the course rather than begin a foreign language. But unfortunately, because of its focus on skills, the course has been viewed as remedial, even though no one, Fedder explains, ever grows beyond the need for attention to skills.

Fedder, who holds a master’s degree in administration and social planning from Harvard Graduate School of Education, has always been interested in how kids learn, and she is thrilled about the way our society has developed a comprehensive and compassionate understanding of the variety of learning styles. One thing, however, has become increasingly clear to her—no matter what type of learner you are, basic skills such as time management, note-taking, organized research, or test-taking, just to name a few, profoundly influence academic success. Different learners may acquire and deploy these skills in different ways, but everybody needs them. What’s more, everybody needs to review them, again and again.

An important moment in the creation of A.C.E. came when Fedder came across a site sponsored by Dartmouth College called the Academic Skills Center that offered exactly the type of reinforcement and support that she was offering through language skills to a student body that seemingly had already achieved a high level of academic success. Fedder visited Dartmouth last year and met with the Director of the Academic Skills Center. This visit corroborated her own sense that learning and teaching are a team effort and that kids of all levels and all competencies, even Ivy League students, can never get enough of this type of skill-based support and reinforcement.

“In no small part,” Fedder explains, “academic success depends on how resourceful students can be about doing what they are responsible for doing.” But most courses are content driven. Teachers everywhere design syllabi around texts and the ideas or concepts they want to tackle, and there isn’t always enough time to identify and then teach all of the skills the students need in order to master that curriculum. Enter A.C.E.—a multi-purpose room for students and teachers alike that sets out to erase the stigma attached to working on skills.
The A.C.E. classroom has four computers for website access and research. Fedder is creating a skills reference library full of books and games, and a library of texts and literature. Here students can find information on strategies for test preparation, improving grammar skills, tips on researching and writing papers, time management, note-taking, reading, and more. She is also building a library of all the texts and novels used in Middle School classes. Most importantly, her classroom is not geared to any one type of learner. There are audio recordings of books, games for spelling, and even a grab and go carousel of skills handouts by the door for students on the run.

The website Fedder has developed is as kid-friendly and accessible as her room. All Middle School students have a tab for A.C.E. at the top of their homepages, which they can access from home. The site is explicit and full of resources. For example, there are blank monthly pages to fill in as students plan out a research paper; the website is linked to the School library and all the predetermined links it provides; there is even an audio assistant.

The center is accessible to all Middle School students before and after school, and during recess, extra help, and lunch. Increasingly classes are held in conjunction with Middle School teachers for the purpose of teaching skills that directly apply to their curriculum.

Through A.C.E. Fedder hopes to provide students with the strategies, fresh perspectives, or personal systems for acquiring the school skills they all need to succeed and to provide teachers with the reinforcement and freedom they need to teach. In her view, A.C.E. benefits everyone. "When we recognize that the role of a resource provider is for all teachers and all learners," Fedder explains, "we will have reduced the gap between our desire to honor uniqueness and our ability to teach necessary skills."

Still Fedder feels that she struggles against the perception that having such a program implies that our kids need help. A lot of the issue is with the kids themselves: no one wants to be seen as wanting, let alone needing, support. So Fedder has enlisted the help of the Upper School students who benefited from her language skills class when they were in seventh and eighth grade. The older students visit the Middle School classrooms during extra help periods and work with the younger students on the variety of school issues that arise. These mentors share their own Middle School experiences and help students to understand the lasting importance of building skills sets of their own.

"Kids depend on us to give them the keys to be as successful as they want to be," Fedder says. "My goal is to help our students develop and master skills that support their learning. Hopefully, that knowledge also instills a good measure of necessary confidence."

---

Candice Hardie '08 and Sam Spector '11
If you love Friends’ Central and...

If you pay corporate net income tax, capital stock franchise tax, bank and trust company shares tax, title insurance company shares tax, insurance premiums tax or mutual thrift institutions tax, then you should be asking, What is the EITC?

The EITC is a way to make a gift to Friends’ Central’s financial aid program as you get a substantial tax credit. Make a gift through the Educational Improvement Tax Credit (EITC) program and receive a tax credit for 90% of the value of the gift.

It sounds like a lot of bureaucracy.
The EITC application is just one page and participants tell us it is very easy to fill out.

Is it worth it? What if I can only make a small gift?
YES! Every gift matters. This year Friends’ Central has received over $180,000 in EITC contributions. Gifts ranged from a few hundred dollars to over one hundred thousand.

How does it work?
EITC gifts go directly to financial aid and their impact is enormous. For example, $180,000 has the same impact on our budget as if we had added $3.6 million to our endowment.

How can I get started?
Call your accountant and then call us. We’ll answer any questions and if you’d like, we can put you in contact with other parents and alumni/ae who have already made EITC gifts.

For EITC questions or to tell us you are interested in participating please call or email Lydia Martin, Director of Development 610-645-5034, lmartin@friendscentral.org or Jim Brennan, Director of Annual Giving 610-645-5036, jbrennan@friendscentral.org
Illuminated Letters

Friends’ Central third and fifth graders had a wonderful overlap of imagination this fall. Both grades created fanciful, colorful illuminated letters as a part of two very different projects. For the Lower School Fall Project, *Into The Woods*, Jack Briggs’ and Sue Clough’s third graders studied Robin Hood and Sherwood Forest. The illuminated letters that hung outside the two classrooms were part of an early journey back to medieval time. The fifth grade illuminated letters, hung in Shallcross Hall, were part of a “Getting to Know You” assignment. Students had to incorporate their initial and at least five interests into the composition. They stained their “ parchments” with coffee and illuminated them with metallic paint.
Last year, Friends’ Central School announced its decision to stop offering Advanced Placement courses. Although our students may still choose to take Advanced Placement tests (as a means of self-evaluation and as a measure to share with the college and universities to which they are applying), teachers are no longer obliged to follow the curricula mandated by the Advanced Placement program. The faculty’s response to this decision was overwhelmingly positive. As Beth Johnson, Dean of Students, and Bill Kennedy, Dean of Faculty, explained in a letter that went home to the community, “the Advanced Placement curriculum often emphasizes breadth over depth and rote learning over true understanding. With our highly trained faculty and very able students, we can be more productive with our time when not harnessed to a prescribed one-size-fits-all curriculm.” Below is a student account of how the decision has directly affected their experience in the classroom.

FCS Chemistry II Advanced Moves Beyond Advanced Placement

by the students of Phyllis Gallagher’s Chemistry II Advanced

This fall, Dr. Phyllis Gallagher’s Chemistry II Advanced class undertook a unique interdisciplinary research project. In addition to following the recognized chemistry curriculum that prepares Friends’ Central students to succeed in first-year college chemistry courses, we embarked on a research-based experiment that furthered our conceptual understanding of how chemistry operates in the “real world” while simultaneously developing the skills we need to perform valid scientific research. The project has evolved to include many other disciplines, including statistics, biology, botany, environmental sciences, international studies, and experimental design, and the cooperation of other classes and faculty throughout the Upper School. We are excited about this experiment in experimentation, one that would not have been possible without the freedom awarded by the removal of the AP course designation. And we believe that we are ushering in a new age of interdisciplinary cooperation at Friends’ Central School and look forward to this exciting research process.

The journey began when we were introduced to a little known plant called ‘duckweed.’ Most of us were hesitant. How, we wondered, could a little known plant be of enough interest and complexity to function as a vehicle to understand chemistry and scientific research in general? As we learned more, our hesitancy disappeared and our curiosity grew.

Duckweed is a small, floating aquatic plant that is grown in third world countries as a feed additive and valued for its high leaf protein content, often greater by weight than soy. Duckweed is also a hyperaccumulator plant used in phytoremediation applications. Hyperaccumulator plants can concentrate metal contaminants in their leaf and root structures. In fact, these plants are often used to “mine” contaminated...
environments of the heavy metal pollutants and thus potentially remediate an environment. But overlap duckweed as an animal food source and duckweed as a hyperaccumulator and you get the potential for human food contamination. When we discussed this problem, we recognized that in the global regions where duckweed is used for livestock food, there is a higher than average likelihood that the plant would, in fact, be grown in contaminated water.

Questions accumulated as we continued to learn more about duckweed, and the purpose of our research project began to take shape around the general question of whether or not there was some additive available to the farmer that would minimize heavy metal uptake without compromising the essential protein composition of the plant.

It was exciting to see how the chemical concepts we learned in the classroom could apply to real world problems. Our next task was to narrow and further define our pool of questions. In order to do so, we needed access to higher-level scientific literature. So we planned a field trip to the Haverford College Science Library to learn more about basic scientific research methods and to help us further define and develop a viable experiment.

Dora Wong, the Science Librarian, talked to us about performing a literature review and how to use the sophisticated on-line sources and search engines available through Haverford College to access the information we needed. She even provided us with a customized link, exclusive to Friends' Central, that allowed us to use the College’s online search engines (http://trilogy.brynmawr.edu/guides/Chemistry/306).

After the lecture, we each took several hours to independently research predetermined aspects of our evolving project. Some of us tried to determine the variation on heavy metal composition of contaminated water, others sought a method to quantify plant protein, still others researched any additives known to minimize metal uptake by plants. The day allowed each student to develop a sense of ownership over one crucial aspect of the total experimental design. It also helped us to appreciate the vastness of any scientific endeavor, the way questions create more questions, and just how difficult it can be to sift through all the knowledge available in order to extract what is really necessary.

When we returned to Friends’ Central, we began the tasks of formally designing our experimental method and of procedure writing. We settled on a specific question, established variables and controls, and identified the relevant and measurable responses that will support our hypothesis. Now we are focusing on writing the detailed procedure, deciding what supplies need to be purchased, and thinking about how to physically perform the experiment this winter.

Melinda Yin’s biology class will help us analyze the protein of duckweed, and our data will be statistically evaluated by John Ricci’s senior statistics class. We hope our conclusions will be compelling enough to allow us to present the results at the Intel International Science and Engineering Fair in March. Look for an update in the next issue of Directions.
Do you remember Men Are From Mars, Women Are From Venus? Even if you never read the book, the phrase probably has the familiarity of an echo. After all, it’s no secret that men aren’t comfortable with tears and women hate to channel surf, or that men don’t ask for directions and women take forever to get dressed. But just a minute: are the differences between the genders really that simple?

This fall, Friends’ Central Upper School students spent an entire day probing the role and validity of common assumptions about gender differences. The program, entitled “Roles, Rules, and Revolution: An Examination of Gender at Friends’ Central and in the World,” was designed by Upper School English teacher, Al Vernacchio, and featured a school-wide survey, student-led discussion groups, faculty-organized workshops on topics such as the legacy of Title IX, biochemical differences between male and female brains, and the effect of gender on friendship), two ten-minute plays, and a talk by Friends’ Central alumna, Maggie Schmitt ’94, on her work with international social movements. There were arguments, reflection, laughter, and a chance for everyone to ask him or herself: “What is it I think about gender and my own place in the world?”

Schmitt, who is living in Madrid and pursuing a PhD, encapsulated the impulse behind the program when she stated, “We all have and live in gender. It makes us who we are. But adolescence is all about wrestling and negotiating with the way rules and roles are imposed, the need to find your way between them, to rebel against them even as you are being shaped by them.”

Schmitt has made a career out of such wrestlings and negotiations, both studying and supporting social movements because, as she explains, they represent individuals reaching bravely beyond themselves to imagine change of all sorts both personal and social. Her message to the students was to use “gender day” as a chance to think about their bodies as a place where politics happen. “Take your own experiences seriously,” she urged her audience. “Dare to ask what works for me? What do I wish was different? And have the courage to hear what your peers have to say about their own, perhaps very different, experiences.”

Vernacchio, who teaches a course on sexuality and society, has been thinking about gender and Friends’ Central for several years. When he learned that Terry Guerin had chosen The Women as the fall play and he heard the early grumblings about the cross-gender casting, he knew he had found a great starting point for the discussion.

Together with some of his students, he developed a survey that explored prevalent attitudes about gender differences. The survey was sent to all Upper School students and faculty, and while the 250 responses did not reveal any startling results, they became the basis for honest, unthreatening discussions in the small, student-led groups. In one discussion, the students bantered about the amount of time they each spent getting dressed in the morning. In another, a statement on the survey that boys take up more physical space than girls prompted a lively exchange. One boy quickly disagreed with the pejorative tone of the statement, but a girl laughingly pointed out that he himself was sprawled out in his chair with his legs spread wide on either side of the desk.

When Terry Guerin introduced the two ten-minute skits, “Babe” and “Beauty,” she emphasized the importance of a sense of humor. “You can and will laugh,” she said. “But I want you to ask yourselves—what assumptions and impulses make us laugh? What is the kernel of truth buried in our laughter?” This is not an easy question for anyone, let alone teenagers, to ask. But “Roles, Rules, and Revolutions” provided Friends’ Central students with a safe place to talk about gender-based differences (and similarities), self and public image, and the way so much of our lives are determined by socially ingrained assumptions.
A Certain Kind of Stance:

Friends’ Central’s Enduring Passion for Teaching

Good teachers change lives. They excite curiosity, stimulate creativity, and instill a passion for questions, conversation, and discovery. They champion adventure and spur growth. They open doors, unfurl maps, and encourage their students to stretch their sense of what is possible out until it reaches to the horizon of their dreams. They laugh, they applaud, they offer comfort, assurance, and a necessary measure of confidence. Their interests and experiences shape the character of a school, affecting even those they never actually reach, and their attitude and comportment serve as ethical, moral, and behavioral touchstones. But just what makes a good teacher? Are there specific personality traits, necessary experiences, or typical habits of mind?

At Friends’ Central exceptional teaching is one of our enduring legacies. Sixty percent of our faculty hold advanced degrees and could teach at the college or university level, and scores of our graduates have gone on to pursue their own successful and diverse careers in education. They’ve become experts in their fields, experimenters, and authorities. But the singular strength of our teachers, those who are members of our faculty as well as those we proudly claim as alums, cannot be described in terms of degrees or professional achievements. Nor can it be reduced to a set of fundamental similarities. It is something less concrete and decidedly more human, something that educator Laurent Daloz described when he wrote: “Good teaching rests neither in accumulating a shelf-full of knowledge nor in developing a repertoire of skills. In the end, good teaching lies in a willingness to attend and care for what happens in our students, ourselves, and the space between us. Good teaching is a certain kind of stance, I think. It is a stance of receptivity, of attunement, of listening.”

Those of us connected to FCS are very fortunate—the stance of receptivity, of attunement, of listening is an integral part of our daily lives, both here on campus and when we move out into the wider world. Meeting for Worship and the academic, service, arts, and athletic programs that define the School all encourage an exceptional responsiveness that Friends’ Central graduates take with them in any number of directions. As you read about the students, former and current faculty members, and alums featured here, think about all the good teachers in your life, for I am sure there are many. And think, too, about the space between us. For more than anything else, what these profiles illustrate is that good teaching begins with an interest in reaching out across this space to shake a hand and forge a connection.

—Rebecca H. Anderson
Many former Friends’ Central faculty members left lasting impressions on the students they taught here. Floss Jackson and Harvey Zendt are just two whose names still figure in conversations among alums. Floss reigned over Girls’ Athletics at Friends’ Central from 1959 until 1981, and as Connie Lanzl’s ’68 tribute indicates, she profoundly influenced the lives of many of Friends’ Central’s female athletes and students. Harvey Zendt spent a fair amount of time in the athletic building as well, down in the wrestling room, or “the Bump” as it was more affectionately known. But he also taught science, social studies, language arts, and surfing during the boisterous period of 1973 to 1988. His energy and enthusiasm for teaching helped shape the character of the Middle School program. Harvey currently serves as Head of School at St. Anne’s Episcopal School in Delaware.

A Tribute to Floss Jackson

by Connie Lanzl ’68

In September, 1959, in most of the nation, team sports for young women were few and far between. Title IX was still twenty-three years away from impacting the boundaries and budgets of every college, university, and high school in the country. The expectations for girls in terms of higher education and career advancement were far less than for boys. And except for anomalies like Wilma Rudolph and before her Babe Didrikson, girls were not only not expected to excel in athletics, but often discouraged from doing so. The rationale might have been, of course, that sports were unladylike, but more to the point, why bother? There were no rewards, no recognition, and no remuneration.

But Friends’ Central in 1959—and long before—held a different attitude. Team sports for girls were encouraged—even mandated—because the school believed strongly in the lessons that could be gained from participating as a member of a team, regardless of gender: cooperation, discipline, acceptance of criticism, leadership skills, strength of character, self-esteem, grace in victory and defeat, compassion, competition, enduring friendships, and memories that last a lifetime. It is possible to gain these experiences in other ways, but team sports contain them all. And in 1959, Friends’ Central clearly believed they could and should be learned by everyone from a young age, regardless of innate athletic ability.

September of 1959 was the first month of Floss Jackson’s twenty-two year career at Friends’ Central. That time also coincided with my introduction to field hockey as a fourth grader. Because I had to wait every day for my father’s football practice or drama rehearsal to end
before I could go home, I filled those after school hours watching the girls’ teams practice. Our first interscholastic competition in hockey started in fifth grade with one contest against Westown. By seventh grade we could join the “Midgets” and play a full schedule of games. I couldn’t wait until I was old enough to play on the varsity and have “Mrs. J” as my coach.

Before that day, though, I had already come to know her. She lived fairly near us and sometimes drove me home with her three daughters. It was clear to me even then that she loved coaching, she loved teaching, and she was passionate about the value of sports for women. I learned that she had been a terrific athlete in many sports before an accident to her leg ended the kind of vigorous participation that she so enjoyed. Fortunately, that did not deter her from passing along her love of athletics to the rest of us.

I don’t know which sport she would claim was her favorite. On the inevitable day in late September or October when the air suddenly had a nip in it, she would joyously pronounce, “It’s a beautiful day for hockey!” The extra spring in her step would encourage all of us to be more enthusiastic and responsive. And then when the women’s basketball rules changed slightly in 1963 to allow two players to cross the middle line, Floss seemed to have a wonderful time applying new strategies to a game that had not formerly demanded as much athleticism. During the spring season she coached both softball and lacrosse at various levels, having to learn the latter which she had never played. This ability to continue learning as an adult, and her pleasure in doing so, has continued until this day: since retiring she has worked on her golf game to become very accomplished and developed her artistic ability to an extraordinary level.

Floss certainly enjoyed coaching and guiding those of us who loved competitive sports. She saw a need for additional learning opportunities and established with Dot Chalikian a summer hockey camp at Friends’ Central that attracted middle and high school players from all over the area. She made sure anyone who wanted to attend could do so, and I was one of many to be able to receive a scholarship. She delighted in following the athletic careers of her players who continued to play in college, and I welcomed her advice and encouragement at the many hockey and lacrosse games and tournaments she made a special effort to attend.

But as satisfying as it was to coach those whose passion for athletics matched her own, I believe she may have gotten the greatest pleasure from empowering girls who, in a less supportive environment, might not have considered themselves athletes, to be important and contributing members of the team. Long before the world figured out that many of the nation’s best female CEOs and politicians and leaders of non-profits had backgrounds that included team sports, Floss taught us to assert ourselves as individuals, to compete proudly, to work together as a team, to establish a disciplined work ethic, and to experience what can happen when a committed group of women works together to achieve a common goal.

During practices and games, Floss’s emotions were usually pretty close to the surface. We had little doubt when she was pleased with us and when she wasn’t. I remember very clearly one basketball game my senior year when we were playing Shipley in their miniscule gym where the walls were the sidelines. The refs were calling the game ridiculously tightly and I quickly picked up several fouls. Although I tried to be careful, I wound up fouling out in the first quarter before either of us quite knew what happened. Floss was so mad at the refs that she decided the safest way for her to let off steam was to exit the gym altogether. She returned shortly thereafter, calmer but still clearly fueled by a competitive spirit. However, the soft side of Floss was also not far from the surface, and her quick response to help those in need touched many of our lives. When in my ninth grade year my father was hospitalized for a brain tumor and unexpectedly required surgery, Floss was one the teachers to whom I turned for support. She talked to me about the strength my dad would expect me to show, but she also let me voice my fear, anger, sadness, and confusion in the comforting confines of her office.

So when I picture Floss, what image comes to mind? At games, an animated and emotional coach on the sidelines. At practices, an organized, knowledgeable coach who pushes her players all the time. At the athletic banquets, a woman with a freshly coiffed “do,” a beautiful corsage, and sparkling blue eyes. And whenever I have seen her since my long ago graduation, there’s the hug, the genuine interest in our lives now, and the familiar, proprietary feeling that, no matter how old either of us gets, she will always think of me as one of her girls.
On Surfing, the Middle East, and Teaching at Friends’ Central

by Harvey Zendt

It’s 7:55 on Monday morning, and the peace and serenity of my empty classroom is transformed quickly into a burst of adolescent energy. There are a dozen different conversations going on simultaneously, ranging in subject matter from weekend plans to world issues to the many events of the school week. There are always at least a few that involve me—questions, advice, a go at the latest joke.

And then it’s 3:15 on Friday afternoon. The door of the classroom closes behind the last student to leave. My heart rate diminishes a few beats, as I begin to reflect on the week and what I need to do to prepare for Monday.

What happened in between these two moments can be described with many adjectives—rewarding, exhausting, fun, enriching just to name a few. For fifteen years that rushing space of time was my life. Whether it was teaching fifth grade, Lower School science, Middle School social studies and language arts, coaching soccer and wrestling, or chaperoning trips to Quebec, the beach or French Creek State Park, my life was a fuller, more enjoyable one because of my interactions with the students, teachers, and parents between Monday and Friday at Friends’ Central.

My interest in teaching began while I was still in high school and, as a counselor at camp, first felt the joy of helping a child grow. After college, I taught for a year in the parochial school system in Philadelphia, but quickly felt the need to work in an environment that had a philosophy more similar to mine. Much to my great fortune, former headmaster Tom Wood called me in August, just weeks before the start of school, with a last minute opening, and Friends’ Central became home!

People often ask how the field of education has changed in the last thirty years. Certainly technology has brought many differences, as have new pedagogical trends and the more complicated nature of society in general. The vast capital improvements in schools make the entire process of education easier—just ask any Friends’ Central wrestler of the ’70s or ’80s who experienced life in the “Bump.” The essence of teaching, however, the chance for a teacher to unlock doors and help children blossom in unexpected ways has not altered a bit. I have been blessed with an educational career that includes seven different institutions, but when I think about my pedagogical roots and my true joy for teaching, Friends’ Central is the first image that comes to mind.

What made my experience at Friends’ Central so special? I would begin with the Quaker ethos of the school, one of acceptance and appreciation of the diversity of experiences and perspectives represented in the community. I remember a series of particularly intense debates in an eighth grade world cultures class about the crisis in the Middle East. It was a tense time and a tense subject, but in my classroom, supported by the ethos of the School, Christian, Jewish, and Islamic students were able to share their thoughts reasonably as well as passionately. There are few places in the world where this volatile issue could be discussed with such sensitivity.

Next I think of the trust the School gives to its teachers to do what they think is right academically and socially for the children. For many of us this means incorporating who we are as people into our curriculum. I have a passion for surfing and was able to share that love with many students within the context of the mission of the school by teaching the physics of the wave. I know that in many schools today such an activity would be considered “fluff,” but creative elaborations and personal connections such as this are part of the substance of the Friends’ Central experience.

Finally, I think of the appreciation the community expressed for the work all of us do with children. Whether it was a thanks from a wrestler at the end of the season, a comment in Meeting for Worship, or a note from a parent at the end of the year, I always felt encouraged and validated for all of my efforts. This appreciation continues, in fact. Just last year I received a book about coaching from a wrestler, with whom I had worked in the mid ’80s but hadn’t seen since. Gestures such as this, the willingness to connect with each other, have given me the impetus to become not only the best teacher I can, but also, I hope, the best person.

Brilliant Guides: A Friends’ Central Legacy

Some individuals are born knowing they want to be teachers; others segue into education after time in other professions; and still others have sudden, sometimes dramatic “wake up” experiences. The alumni/ae featured in this issue, a sampling of the many talented teachers who have graduated from Friends’ Central, came to teaching in a variety of ways. They share, however, a clear passion for their work and a deep appreciation of the quality of teaching they themselves received here at FCS.

Mary Louise Alexander Cole-Wood ’52

Ill of her life, Mary Louise Alexander Cole-Wood ’52 has wanted to reach out to people and help them lead better lives. She was an only child in a family that lost everything during the Depression, and her parents worked hard in the real estate business in order to regain their footing. But their necessary preoccupation with their own work and welfare left no room for altruism, and so it wasn’t until she enrolled at Friends’ Central in 7th grade (1945) that Mary Louise first experienced the satisfaction of giving to others, especially those whose circumstances were less fortunate than her own. Now as the founder and director of Bay Point School Inc., an alternative boarding school that provides educational, vocational, and therapeutic services to moderate-risk adolescent boys, service to others has become her life.

After Friends’ Central, Mary Louise went to Penn. She married, lived in South America for a while, and had three children. When her third child was ready to start school, Mary Louise went back to school as well, initially as a first grade teacher and then as a PhD student in Childhood Development at the University of Miami. Mary Louise still recalls the ten years she spent in first grade as some of her best. “In those days,” she says, “children came to first grade not knowing anything. Each one of them was a tabula rasa. When they left, they could read and write. Math was one of my favorite lessons. First we established a toy company and sold stock to the children in the other grades for 50 cents a share. With that money, we took all of the children to a toy job fair, and the children each selected one toy to sell. Then we set up a little market in the cafeteria, and they had to keep track of their sales. At the end of the week, we were able to pay our ‘stockholders’ $1.00 a share for their stock. It was an enormously creative time.”

Mary Louise has continued to employ such creativity throughout her career, but her work is also defined by her strong commitment to helping her students lead better lives. Shortly after earning her doctorate, Mary Louise founded a charity that took up the care of abused and neglected children called the Children’s Home Society. Many of these children had been taken out of abusive homes against their will by police officers. Mary Louise was concerned about the emotional repercussions of the trauma, and so she had police officers come into the school for several hours every week just to play with the children. “It is so important for these children to know that cops are nice people that they can trust or turn to.”

In 1992, when Hurricane Andrew barreled across Florida, Mary Louise was asked to help coordinate the church volunteers that poured in from all over the country. She borrowed a 45-acre piece of property and worked with Franklin Graham, the Reverend Billy Graham’s son, built a camp for the visiting volunteers and the Interfaith Coalition for the Andrew Recovery Effort (I.C.A.R.E.) was formally established. The work was rewarding and immediate, but after a year and half, Mary Louise knew she wanted to get back to working with children. What happened next is an example of the way the various strands of interests we spin can sometimes, with a lot of work and a good dose of good fortune, be woven together.

Mary Louise was enormously concerned about the number of teenagers being sent to adult courts without a chance for rehabilitation. The problem was twofold—there was no place else for these troubled young people to go except jail and the predominant view was that juvenile delinquents needed punishment not treatment. So she convinced friends with a large family foundation to purchase the 45-acre property on which she and Graham had already built several buildings, and came up with the idea for the Bay Point Schools, Inc., a boarding school for troubled teenage boys “dedicated to building a safer community through
positive peer pressure and education, one youth at a time.” Then, one of the original police officers who had volunteered at the Children’s Home Society became Florida’s first Secretary of Juvenile Justice. Mary Louise explained to him what she wanted to do and that she had land and cabins that could be used as classrooms and dormitories. He gave her an initial contract for thirty-six boys. Now she has two hundred and twenty-eight boys, three campuses for boarding and schooling, and a fourth campus devoted to helping the boys live independently. Many of the boys come to Bay Point through the Department of Juvenile Justice; others are private students. What is most important for Mary Louise is that she doesn’t have to wait for a child to be arrested in order to offer help.

Many of the boys who come to Bay Point are from families with little to no high school experience. As Mary Louise explains, “They are boys from a part of society with little hope. It has never occurred to most of them that they could do anything other than end up like their dads and brothers. Educating them is about transforming how they understand what their lives can look like.” Part of how Mary Louise accomplishes this transformation is to emphasize education, behavior modification, and moral development rather than the more traditional focus on punishment. The boys take a traditional course load, are taught in small classes, and are required to participate in interscholastic activities such as debate team and sports. For Mary Louise, requiring them to interact with and compete against students from other Florida private schools teaches them to beat their reputation through self-discipline and gentlemanly behavior. Recently, the Bay Point debate team handily beat a team from the University of Miami and Mary Louise’s students faced another challenge—how to handle the flurry of positive media attention.

Even down in the far reaches of Florida, Mary Louise draws on her time at Friends’ Central. All of her Bay Point boys must participate in community service. “We all grow when we help others. The chance to experience this type of growth is especially important for these boys who have spent most of their young lives taking from others. It gives them a sense of self-worth, strength, and connection to the world.” Mary Louise has developed a strong tutoring and peer mentoring program, and the Bay Point Boys work with handicapped children at a nearby horse ranch and at-risk students at a neighboring elementary school.

The fourth campus at Bay Point School is devoted to independent living. It has always been important to Mary Louise that the programs she establishes are not transient communities, a chance at a better life that can be dipped into and passed up. For the young men she works with at Bay Point the issue of moving on is central. Mary Louise’s intention is to prepare all of the boys she enrolls for college and technical school, and most of them do eventually earn a college degree. But for many, the immediate need is to find their way into the job market. Whether they are applying to college or looking for a job, Mary Louise wants her Bay Point boys to have the opportunity to change their lifestyle without being swallowed up by old habits and relationships. After all, for a large number of her students, the family business is selling dope. So she allows everyone to choose to stay at Bay Point for one year after graduating, to work and save enough money to move on.

Mary Louise is quite open about the fact that her own life changed dramatically as a result of being part of a value-based school environment. “The Quaker belief that God is a father and that all of us have a direct line to our father was very important to me. The boys I work with now need to know someone is listening. They need to know that they are not out there alone. They need to be encouraged to feel their own inner spirit. So I try to speak and interact with them a lot, and I encourage my staff to do so as well. We are all God’s children and we all deserve respect.” In fact, Mary Louise trains her staff to forget why the boys are at Bay Point. Their goal is to praise all of them as much as possible, to help them know that there is something in each of them worth saving. Based on the number of boys she has seen enroll in college, hold down steady jobs, or just learn to smile and enjoy interacting with their peers, Mary Louise’s efforts have been enormously successful. By her own admission, Mary Louise knows she has her Quaker education to thank for much of this.
Sidney Bridges ’79

When Sidney Bridges ’79 returns to Friends’ Central, the floors of the Wood building make him smile. Each creaking step connects him to the nine years he spent here as a student, a time in which important seeds were sown and nurtured, seeds that still unfold in unexpected, gratifying ways. As the head of the English department at Brooklyn Friends School, Sidney says he draws regularly on the resources he acquired and the values he internalized at Friends’ Central. In particular, he thinks a lot about the legacy created by schools and the teachers that shape them. “It is impossible to overestimate the power of real teaching,” Sidney says. “Real teaching extends beyond the classroom, beyond the texts and tests. Real teaching is a way to fight for the values of the human heart.”

Sidney is passionate about teaching, and he readily admits that since he has become a teacher, he can’t remember a time he’s ever dreaded going into work. Unlike Mary Louise Cole-Wood, however, he did not go into education by design. After graduating from Friends’ Central and then Williams College, Sidney spent several years in the corporate world, first as an underwriter for Chubb & Son and then as a consultant for The Richardson Group. But he could feel himself drifting, and he knew that he wanted more intellectual stimulation. Around the same time, he had a conversation with former FCS head of school, Tom Wood, about his restlessness, and Tom asked if Sidney had ever considered teaching. The idea caught him off-guard. He’d been raised by an inveterate teacher, enjoyed a few summers as a tennis counselor at FCS summer camp, and always felt uniquely at home when he returned to the FCS campus, but he had never thought of himself as a teacher. Tom encouraged him to explore the possibilities, and a little while later, a job offer from Friends’ Academy in Locust Valley, New York seemed especially fortuitous—Sidney had a good friend in college who’d gone to Friends’ Academy and Tom Wood had worked there before coming to FCS.

As Sidney describes them, his first moments in front of a classroom were terrifying, though in retrospect “miraculous.” Although he had an instinct about how to lead a class, he did not know all of the things a teacher attends to in one class period. What he did have were the examples set by his teachers Clayton Farraday, Paule Pierre-Louise, Chris Dorrance, Jeff Bowker, and Michi Tashjian, at FCS. He clearly remembered the way teachers and coaches such as Bill Bower, Ted Yarnell, and Juan Jewell had managed to be caring, non-judgmental, and demanding all at the same time, and how with their encouragement and understanding, he had learned to be himself—no small feat for a teenage boy. So Sidney set himself a similar challenge: when he stood before a class, he would remember who he was at age 14, 15, or 16 even as he thought about the text at hand and the lessons planned. To this day, Sidney tries to stay connected to his students and to best understand the connection his students form with the literature he shares by keeping himself in these two places at once. “We are all students; I am a student, too,” he says.

In a curious way, what Sidney teaches mirrors how he teaches. “Literature,” Sidney explains, “is about problems of the human heart. In literature, we confront life’s ambiguities, all the contradictions and conflicts people encounter. We admire or pity characters, for instance, based on decisions they make. As a result, when we react to a story, or when we ourselves write, we discover what we think and believe.” But our reactions are based on our own experiences, hopes, and world view. And so Sidney often asks his students to consider other perspectives, whether of a character, or a writer from an earlier time period, or even of the classmate sitting right next to them.

“One of my goals as a teacher is to get my students into the habit of looking for their own connection to a text, which is to say their connection to the world.” He likes the fact that writers are people who are very attentive to life and its details, and he tries to model that attentiveness and encourage it in his students. He’ll ask them to “Find a line, any line that you connect to, and tell me why it speaks to you.” But the next step is to listen just as closely to what someone else has to say.
Such attentiveness is not always easy or natural. “I am very concerned about the world we live in,” Sidney admits. “We are bombarded by stimuli and rushing from one appointment to the next. It is getting harder and harder to slow ourselves down enough to look, listen, and appreciate. But I try to do that in my classes.” Most of Sidney’s classes begin with a moment of silence. Typically he follows that moment by posing a question. He’ll ask his class something about the story they’ve just read or about a character, and then he’ll sit back, without rushing in to goad a response or direct the discussion. By deliberately slowing down in this way, Sidney hopes to achieve what he views as a third goal of education, namely to act as a “counteracting force to the tyranny of the schedule.”

In a recent Senior Dinner address that Sidney delivered, he started with the statement: “Anything that brings the world together is a blessing: Moments of silence, Nature, Music, Art, Literature, Honesty, Education, Technology (when used sensibly), Leadership, a humble, well-placed comma, You, the class of 2006.” For him, teaching has been a way to bring the world together, to share his own enthusiasms and beliefs with his students, to appreciate theirs, to forge connections, and to encourage a deliberate attentiveness. One of his greatest rewards has been the continuity that he now finds all around in moments like those when Bob Hallett and Tim Golding, the later a teacher who had failed him for his use of fragments in seventh grade, sat in on a class and watched him teach syntax, or in sounds like the familiar creak of an old wood floor welcoming you home.
became interested in teaching when I decided to switch careers.

After graduating from Haverford College, I went to Penn for a degree in Government Administration. For about four years after earning my Masters degree, I worked as a management consultant for a couple of firms who specialized in public transportation. Then one day, in the middle of a typically grey Philadelphia March, I took an afternoon off from work and had a transformative experience.

For some reason I decided to go to Friends' Central that afternoon, even though I had not visited the School in some time. It was just after dismissal, and I saw kids playing outside in the oval waiting to be picked up by their parents. At first, I chuckled at the contrast—the kids were happy to be outside running around in the chilly weather, while my co-workers, stuffed into their cubicles in an office park, most likely were grumbling about the awful day. But then I stopped smiling because I realized that the students, at least at this school, were participating in a life that was much saner than the one I was living. It struck me next that such exuberance might not be typical of students at all schools. So I thought some more, this time about all of the students who don't have access to a school like FCS or Haverford College and who don't get to work with the types of teachers and mentors that had influenced my life. In that moment I decided to become a teacher.

My first step was to go back to Penn and enroll in the Graduate School of Education. While in graduate school, I served as a student teacher at Overbrook High School where I was exposed to a mirror image of the privileged education that was occurring less than a mile away at FCS. In one sense, the process of schooling at Overbrook worked. Classes met, teachers taught, and students learned. Apart from the classrooms of a few teachers, however, most of what happened there paled in comparison to the instruction in good independent schools. I wasn’t used to this mechanical way of educating, and during my free periods, instead of hiding out in the teachers’ lounge, I gravitated to the few rooms where there was actually something happening.

One of the things I learned by working at Overbrook High School was that a key component of my education can only be described as soulfulness. At Friends’ Central, it was accepted that academic learning was only one component in an individual’s journey, and that there was much more to learning beyond the accumulation of facts or a portfolio of skills. Ideally academic learning was tempered by wisdom and human kindness. This balance was not taught at FCS in a course called “Values”; it was simply exhibited by teachers who cared deeply about the core principles of fairness and tolerance. Without being conscious of it, my studies in virtue (as the Greeks might call it) began as a four year old with Charlotte Haskell and extended over the next fourteen years with teachers who are too numerous to list.

There are three educators at Friends’ Central who were critical to my later career as a teacher: Bettina Moore, Frank Groff, and Clayton Farraday. My teacher in Pre-First, Mrs. Moore, was a gifted educator who was especially kind and accepting. I cannot recall very much of the year I spent with her, but I know now, deep in my bones, that my life as a Quaker teacher is partially a reflection of Mrs. Moore’s influence on me.

Mr. Groff was my PE teacher for several years. I adored him, because he taught us that athletic accomplishment must take a back seat to a rigorous code of sportsmanship and principled behavior. Trying your best was much more important than winning, and an acceptance of everyone’s participation, no matter what their ability, came before everything else. We could sure use a few more Frank Groffs in the world today.
Finally, when I first decided to become a teacher, I had an important conversation with Clayton Farraday. We were walking from the Upper School to the newly completed library, and he told me to teach the “Truth.” I didn’t know what he meant at the time, but I think now I do. The “Truth,” as it is found in Quaker education, is a place where inquiry, fact, humanity, and moral autonomy all meet. Our jobs as teachers should be to make ourselves increasingly obsolete; not just because students should be able to work on their own, but because they ideally should be further moved along their own individual path. In short, our job is to give students the capacity to seek “Truth” for themselves.

After fifteen years as a teacher in Quaker schools (Mooresstown Friends, Monte Verde Friends in Costa Rica, Brooklyn Friends, and Abington Friends), I am now back in the School District of Philadelphia. Since last March I have played a role in creating a brand new high school in Center City called the Science Leadership Academy. We are a small, progressive, magnet school that embraces technology and seeks to incorporate the value of student-driven inquiry into all of our classes. Somehow about ten teachers who feel similarly about education, arrived at the same place I did to form the founding faculty. Who knows? With a little bit of luck perhaps a few more kids in the School District of Philadelphia might get the education they deserve. One thing I do know, when they are in my classroom, they will be directly influenced by the faculty that first led me to seek the truth at Friends’ Central 25 to 40 years ago.
Anne Ross ’94 grew up as a faculty child at Friends’ Central, and despite the occasional conflicts between her age-appropriate rebelliousness and her father’s constant presence, she fondly recalls that “my education was my extended family, and the campus felt like home.” Although she says that even from a young age, she always wanted to be a teacher, it is hard not to think that this overlap played a role in how she chose to realize her ambition.

After Friends’ Central, Anne went to Penn State, where she earned a B.A. in African American Studies and fulfilled the coursework for a minor in sociology. At that time, African American Studies was a new major and there were not many white students in the department. But Anne delved into the material, relishing the way her studies complemented the interest in advocating social justice that she inherited from her parents and Friends’ Central. During the second half of her junior year, she went to Ghana, where she encountered a degree of poverty and injustice beyond anything she could have understood from her studies or life in the United States. She found the experience so provoking that she quickly completed the coursework for graduation, wanting to find a way to make a real difference as quickly as possible.

Through another Friends’ Central alum and fellow faculty child, Mark Tashjian ’80, Anne heard about the East Harlem School at Exodus House in New York, a small independent school whose mission was to provide educational opportunities to underprivileged inner city children in fifth through eighth grades. When Anne moved to New York to volunteer, the unique educational project astounded her, and she has been there ever since, working to advance the school’s mission of helping children from low-income families “develop academic excellence, moral integrity, courtesy, and an unshakeable commitment to their future and the fate of their community.”

The East Harlem School grew out of the work of the Reverend Dr. Lynn Hageman and his wife, Leola. In 1963, the Hageman’s founded a drug rehabilitation center called Exodus House, in East Harlem in an attempt to combat the destructive effects of heroin addiction on the community. They ran the center for twenty-one years, until in 1984 they decided to shift their focus from adult addicts to forgotten children and converted the facility to an after-school and summer program. During this entire time they lived at the center and raised their own three children as a part of the East Harlem community with one significant exception—all of them were sent to independent schools in New York City. Two of the children, Hans and Ivan Hageman, who both went to Collegiate and then on to Harvard and Yale, returned in 1993 to advance their parents’ efforts by providing the children of Harlem and East Harlem with the same rigorous education they had experienced, which they hoped would lead to the opportunity to be seen and acknowledged in the wider world.

Fourteen years later, Ivan runs the first independent school in Harlem to be built entirely with money from the private sector. A recent $1.5 million capital campaign has resulted in a new school structure; the student body has more than doubled; and there are plans to continue increasing the size of each grade. Anne Ross joined the EHS faculty at the beginning of this period of growth, and she has participated in all of the transformations. She is proud of the school and excited about her work, even though she no longer teaches as much as she had hoped. When she first started at EHS, she taught math and science for four years, but then took some time off to earn a master’s degree in Educational Policy and Social Planning from the Harvard School of Education. As a graduate student she explored how teaching fits into a larger educational landscape. In particular, she considered the question, how can education be used to improve individual lives and the life of underprivileged communities? Over and over again, as she visited public schools in and around Boston and saw the same scenes repeated in all types of communities—large classes filled with disengaged kids and teachers who either could not or would not see and respond to what the kids needed—her commitment to the mission and work of EHS grew.

When she returned to EHS, she found herself drawn into conversations about architecture, campaigns, and grant writing, and now serves as Dean of Faculty and Staff. This unplanned transition into an administrative role has been easier than she expected because of EHS’s philosophical and practical dedication to improving the lives of its students by engaging the whole child, mind, body, and spirit. “I love direct contact with kids. That’s why I wanted to teach, so that I could get in there with a kid and make a difference. At EHS, everyone understands that children succeed when they are motivated, and that nothing motivates a child as much as direct, responsive relationships with people who care.” The school’s emphasis on contact and connection begins in the admission process. Unlike more traditional independent schools, EHS is not tuition driven and admission is not based on test scores. Anne explains that the admission process is really about finding those kids with a spark—a true thirst for more knowledge, more opportunity, and more experience. “Prospective students have to say, ‘I really want to go to this school,’ because it is a big commitment. We are taking kids
out of their immediate environment and asking them to rethink almost every aspect of how they've learned to live their lives. Take for example our meal plan. We are a vegetarian school. This decision was made for two reasons. On the one hand, many of our students come from families in which a healthy diet is neither a focus nor an economic possibility. Greens and complex grains just aren't part of a lot of their dinners. So we have assumed a responsibility for improving our students' diets as well as their minds. But the decision is also an ethical one. We hope that if the students are required to eat different foods, they will develop an openness to the world in general."

The school’s holistic approach is one of the things that impresses Anne most about the program, and she firmly supports its sense that it is admitting the whole family, not just the individual student. After all, she explains, “We are not saving kids from their situation. We are empowering families to support their children in their attempts to improve their lives and opportunities.” In order for it to accomplish this goal, the school has to encourage the traditions and strengths of its students’ neighborhoods and families, even as it pushes them to seek broader opportunities and experiences. This delicate dance is most apparent when the students reach eighth grade and graduate. One third to one half of them go on to independent schools in the city or boarding schools. While boarding schools have more funding and a more level playing field, they also take the kids further away from their communities and disrupt family life. Day schools, on the other hand, keep kids at home, but also force them to confront dramatic socio-economic and social differences on a daily basis. Whatever path they follow after EHS, Anne believes that her students’ chances of having a better life depends on their connection to their families and homes. As she says, “It is all about coming back and improving the community not just sending the individual off to participate in a different, better life.” She may have been born a teacher, but the way she sees education as a family affair certainly has its roots in her early experience at Friends’ Central.◆
Now & Then

At Friends’ Central, we are delighted to have so many alumni/ae who have returned to join our faculty and staff. Can you properly match the now & then photos of those featured here?

Exceptional Teaching at Home

The current faculty at Friends’ Central is a group of teachers without parallel, and a list of their accomplishments and credentials would fill the next few pages. But what really sets them apart is their remarkable ability to demonstrate how much they care about their students’ moral and intellectual development as well as their mastery of the course material. So while much of their time is spent on the mechanics of teaching—tying shoelaces, filling paint jars, devising syllabi, leading and monitoring discussions, and grading tests or quizzes—they are also always seeking ways to encourage questions and emphasize the connections between their lessons and the world at large. They are attentive, encouraging, creative, and very original. For this issue, we’ve selected one teacher from each division to highlight, but the work and dedication of all our teachers deserves a resounding round of applause.

Lou DelSoldo is one of the few teachers at Friends’ Central whose influence reaches from the youngest child to the oldest. Right now he is the Assistant Principal at Lower School, a role he assumed after first teaching pre-kindergarten and kindergarten here for nine years and then serving as Director of Early Childhood Education. His office is at the Lower School, he works closely with Cynthia Harris, Assistant Director of Admission for the Lower School, and he knows every student there by name. But Lou also knows quite a few members of every graduating class as well, and not only because he remembers them from their days in second grade. Several times a week, Lou comes over to the City Avenue campus to teach an introduction to psychology course to seniors, and once a week he welcomes his seniors to the Lower School, where they work with the younger classes on objective behavioral descriptions, event and time sampling, and data collection. Lou always knew he wanted to be a teacher, and he still misses getting down on the floor with four-year olds (not to mention the regular snack and rest time). His psychology class provides him with the direct contact with young people he so enjoys, and it allows him to share his passion for teaching. This year, he has had the unprecedented chance to see two of his former psych students return to FCS and practice some of what he taught them in their new roles of assistant kindergarten and pre-kindergarten teachers.

When asked about the challenges and rewards of teaching, Lou is quick to say that for him, there is no greater reward than a class well-taught. He is equally quick to acknowledge that the flip side of that statement is also true—there is no greater disappointment than a class gone awry. The real challenge for all teachers is to find their own style. “I don’t believe one style of teaching works for every person—teacher or student,” Lou says. “Here at Friends’ Central, there is not a lot of regimentation about how to teach. We are all given the freedom to become the teachers we are. I have found that I like to flirt with chaos. I like to raise ideas that are provocative. I like to trigger a buzz in the classroom as my students get excited about a topic or question. But I also want to be able to pull their attention into focus and keep the conversation centered.”

As for the unusual range of ages with which he interacts, Lou loves it! “Teaching is the greatest profession,” he says. “You are being paid to learn, plus being around kids all day keeps you young, alive, and growing. I have the best of both worlds. In Lower School, I get an awful lot of hugs, and with my seniors, I get to share the energy and vitality of the next generation.”

Alexa Dunnington ’98 went in to teaching after working in the National Trust for Historic Preservation in Washington, D.C. “I worked in a cubicle, and then one day I realized I needed to be working with people.” Teaching was the first thing she thought of since she had tutored all through college and always enjoyed young people. She returned to Philadelphia and worked as the permanent substitute at FCS for one year. During that time, she also took a graduate course at Arcadia College with Leif Gustavson, her eighth grade Language Arts teacher, called “Writing to Improve Literacy.” The course convinced her that she wanted to become a Language Arts teacher, and serendipitously, the very next year, Friends’ Central had just such an opening.

Today, Alexa teaches seventh grade Language Arts. She has named her course, “The Writing and Reading Workshop” because of her expectation that her students will work together to become better readers and better writers. She also coaches varsity field hockey and Middle School girls’ lacrosse. As a teacher, Alexa has two main goals: to teach her students to appreciate the power of language and the ways we communicate, and to dispire the notion that you lose your imagination when you get to be a certain age. “The students I teach are developmentally at an age when learning how to communicate well is essential,” she says. “But they are also struggling with...
what this means. Even in seventh grade, high school looms large.
I need to prepare them for all of the expository writing they will
have to do, and most of them think that essay writing is boring and
can’t be creative. I try to teach them that it is always creative
because it is your individual interpretation. Any essay you write
is about how you imagine the text.”

Alexa has a Virginia Woolf quote along the top of her class-
room wall that captures the interpretive stance she hopes to
encourage in her students. “Literature is no one’s private ground,
literature is common ground; let us trespass freely and fearlessly
and find our own ways for ourselves.” But she also emphasizes
the strong influence her own Quaker education has had on the way
she views the world and the way she teaches. “Lots of kids feel
that literature is beyond them. I want my students to feel that
everyone has access to literature. All you need is to trust the
power of your imagination and trust your ability to communicate
well.”

Alexa’s Quaker education also influences the emphasis she
places on using language to reach beyond the classroom. As they
practice essay writing and literary analysis, Alexa requires her stu-
dents to think about how they can use language and their ability
to communicate well to be active members of their communities.
At the beginning of every year, she talks about how important
the concept of free speech is in our society, and she tries to draw
a connection between the political or social exercise of free
speech and each student’s ability, or right, to interpret the texts
on her syllabus. Last year, she devised a mock trial as a way to
emphasize this overlap of the literary and the social or political,
and to point out all that is at stake in literature. Her students had
to craft arguments for and against the banning of a couple of
children’s books from an imaginary community. The exercise
tested their command of persuasive language and required them
to consider what type of effect a book can have in society. She
also regularly brings in newspaper and journal articles and asks
her students to write letters of response to send to the newspa-
per’s editors. “Writing and literature,” she explains, “have to be
about more than just what happens to the characters in a book.
Whether we are reading a play by William Shakespeare or
responding to an article in the Philadelphia Inquirer, I want my
students to consider how we can use our ability to communicate
to be engaged citizens.”

Jim Davis has taught music and led the choral
groups at Friends’ Central for thirty-five years.
He has always known he wanted to be a teacher,
mostly because of the teachers he had as a child.
“In Junior High I used to say to myself: ‘They
look like they are having a lot of fun,’ and I
could tell that they were people who loved what they
were doing. I also admired their commitment
to their subjects and the way they related to us. I recognize
that I was a difficult eighth grader, but somehow my teachers
were able to reach past all of that and make me feel connected to
them. I admired that then, and I admire it even more now.”

Jim earned both his Bachelor’s and Master’s degrees in Music
from West Chester University. After graduating, he took a job at
Wayne Elementary School. As fate would have it, the string
teacher at Wayne played in a chamber music group with a music
instructor from Friends’ Central, and when a job opened up
here, Jim’s co-worker encouraged him to pursue it. Without this
encouragement, Jim probably would never have looked into
a teaching at an independent school, but he believes that being
here has enabled him to fulfill his vision of good teaching. “Here
I am surrounded by a faculty committed to making themselves
available to kids, and I work in a school committed to support-
ing music as part of the curriculum.”

One of the things Jim is most pleased about is the way the
music program has expanded during his time here. When he
started, there was one chorus, one orchestra, and the option for
private lessons. Now Friends’ Central has Upper School, Middle
School, and fifth grade choruses, six singing groups, two orches-
tras, two jazz bands, and opportunities to play
chamber music. There are also course offerings
in music and still the chance for private les-
sons. “Music has a place in the cultural life of the
School,” Jim says, “and this is important,
because music gives kids access to a unique emo-
tional language. Music stirs them. After a con-
cert, there are always kids weeping, because we’ve
created a world in which we’ve shared our emo-
tions. It is a very power-
ful connection to share a breath and express emotions for which
we otherwise might not have words.”

Jim believes that participation in the music program also
complements the individualism the school supports. “Friends’
Central does a fantastic job at encouraging individual thought
and expression, but there is also a significant value to all of us
learning how we fit together. Music, like sports, helps us figure
this out.” The fact that Jim would compare chorus to soccer, for
instance, is not without a certain amount of irony. The athletic
teams and the music groups have to share the limited time stu-
dents have after school, and the relationship is not always easy.
But Jim is clear that just like playing on a team, singing in a chro-
rus or playing in the orchestra requires that a person subvert his
or her individuality for the good of the group. “It is an important
bonding experience and an important lesson in how to build
strong communities.”

One of Jim’s greatest rewards has been the chance to welcome
former students back to campus. “I wanted to be my high school
music teacher,” he says, “and so just the other year, I made sure I
wrote to him and let him know where I had ended up. As a
teacher, I have learned how important this is. You never know
what connections you are making, and I, for one, am always
wondering if everything I teach is just dissipating. So the best
feeling for me is when one of my students goes out and makes a
career in music, and then wants to come back and share it. Then
I really feel the bliss of teaching.”

Jim Davis
Imagine twenty first graders in a classroom with their math books open to the page above. Hmmm, let’s see, “Measure the length of the bookcase in fathoms. Measure the length of the cubby room in paces and the length of your work table in hand spans.” Don’t forget about the cubits and digits! Now picture their two teachers trying to explain these instructions to the roomful of six and seven year olds, help the children measure, maintain some order, and verify (within reason) the 160 results produced, all within a thirty minute period. The solution? Save this math page to do with... Book Buddies. (There should be a blare of trumpets here!)

Although no one seems to know for sure when Book Buddies started at Friends’ Central School, the consensus is that it began sometime in the early 1970s and may have been the brainstorm of Jane McGee, a first-grade teacher, who was seeking more opportunities for her students to read one-on-one with a good reader. As a corollary, some say the program began as an opportunity for the older children, regardless of their relative skills, to realize what competent readers they had become and provide a safe way for them to practice, demonstrate, and take pride in the skills they had acquired. All agree that the program was and is a way to have children of different ages work on language arts and other skills in a friendly environment laced with the excitement of mingling with “unknown” people from the FCS community.

Regardless of its origins, Book Buddies has thrived and metamorphosed into a tradition in which older children now regularly help to teach, and learn from, younger ones. In many ways the term is now used as a catchword for groups of students of different ages working together on projects ranging from reading, to math, to psychology, to building projects, to arts and crafts, to service. Today, the entire fifth grade serves as Book Buddies to the first grade, meeting once a week from early in the school year until Winter Break. For the rest of the year, the opportunity to be a first-grade Book Buddy is available as a service project choice to all Middle School students.

Fourth graders also serve as weekly Book Buddies to kindergarten students, where last year, in one classroom, they helped to fasten the support ropes for a 15-foot replica of the Brooklyn Bridge, as well as make milk-carton cars to cross it. The annual highlight of this program, however, is probably a semiautobiographical book about the younger child written and illustrated by the older one. I still remember my daughter, who never shared
tales of her school life, bumping into her Book Buddy on the street, only to hug her, grab her, drag her over, and gleefully explain to me, “She’s the girl who wrote the book about me.”

Eighth-grade science students are now teaching sixth graders about water monitoring, as well as meeting with pre-kindergarten and kindergarten students every five to six weeks. They assist the younger children with some of their projects but also use them to examine Piaget’s theories of cognitive development, sending a copy of their science reports to the children’s teachers, as well as their own teacher, at the conclusion. Twelfth-grade psychology students also meet with pre-kindergarten and kindergarten students to observe and record their behavior. They use this time together for everything from verifying (or disproving) the hypothesis that girls talk more than boys at a given age (using time-sampling observation), to determining inter-rater reliability, to Piagetian conservation studies. Additionally, individual Upper School students regularly come to the Lower School both for Service Days and for up to five weeks for Senior Projects.

So in its larger catchword sense, Book Buddies is: a way to show children the rewards of teaching; a half-hour solution to projects that would take a teacher an afternoon; many sets of extra hands and loving arms for Halloween parades; an incentive for a younger child to work really hard for a big Book Buddy; an incentive for the older child to live up to the expectations of a hero-worshipper; a cure for the grade-level pecking order that exists at so many schools; a bridge between the campuses; and a powerful and effective way to emphasize community and service.

Perhaps most importantly, Book Buddies builds friendships that would not otherwise exist within our community. Consider the first grader who was only having five friends for a special birthday treat and requested that his fifth-grade Book Buddy be one of them. When the older child accepted and came, the mother repeatedly thanked him and told him how kind he was to come, until he replied, “I wanted to be here.” And guess what he brought for a present? A good book. ♦
IMPORTANT NEWS FOR ALUMNI/AE AND FRIENDS WHO ARE AT LEAST 70 1/2 years old!

New legislation allows IRA owners to share the wealth of their retirement savings now by giving directly to charity—without first counting it as income and paying income tax. This provision is only effective for tax years 2006 and 2007. If you are interested in learning more about this wonderful opportunity, call Friends’ Central’s development office without delay.

To join members of the Blackburn Society, please contact Lydia Martin at 610-645-5034 or lmartin@friendscentral.org.

From the Co-Chairs of the 2006–2007 Annual Giving Campaign

Friends’ Central offers children the richest of experiences. Just think about what we provide for them. First and foremost is academic excellence, an unparalleled education fueled by a dedicated, caring, and innovative faculty. We have state-of-the-art tools to facilitate the learning process. This includes seven computer labs, tablet PCs, Wi-Fi wireless network access, personalized websites for faculty and students, and a cutting edge Intranet that allows our students to keep track of homework, collaborate on coursework, conduct research, and communicate with faculty with a click of a button. Our Upper School science laboratories are without equal in our region; the new state-of-the-art track will complete our athletic facilities; and the opportunities for service and travel abound. Finally, we are committed to enrolling talented students with financial need.

Of course, all of this comes at a cost; a cost that is not borne by tuition alone. We are dependent on the generosity and support of our community of parents, faculty, and friends to continue providing our kids with the finest of educational experiences. The opportunities to give are many, and the needs are great. Whether it’s to give financial aid, buy technology, pay salaries, fund student services, or simply to turn on the lights, we are indebted to your kindness and belief in Friends’ Central. Please accept our sincere gratitude.

Lawrence S. Reichlin
Robert Gassel ’69

Co-Chairs of the 2006–2007 Annual Giving Campaign
Headmaster’s Reception

The Headmaster’s Reception celebrates leadership giving to the Annual Giving Campaign.

1. Margie and Bryan Weingarten and hosts Mary and Marshall Bassett
2. Adrian Castelli and Philip and Karen Ivory
3. Bill Weiner ’76 and Jean Weiner
4. Mike and Cindy Silver, Carol and Brad Braddock
5. Jim Bergen and Ann Satterthwaite, Clerk of the Board of Trustees
6. Hosts Marshall and Mary Bassett and Headmaster David Felsen
7. Matthew Levities ’86 and Anja Levities ’86 and Lauren Rubin ’83 and Jonathan Rubin ’83
8. Wendy Kane, Judy and Ed Grinspan, Jeffrey Margolies, and Raymond Reed
9. Jonathan Fleishman ’82 and Cathy Fleishman and Sharon Weiss and David Arnold
10. Joanna McMorris, Headmaster David Felsen, and Art McMorris
The 2006 Golf Classic

The 17th Annual Friends’ Central Golf Classic took place at the ACE Golf Club in Lafayette Hills this past June. The money raised supports the financial aid program at Friends’ Central. This year, over $36,000 will go to help Friends’ Central open its doors to children with limited financial means.

1. Andrew Stiller ’57, Pete Drayor ’57, Josh Klein ’80, and Tom Biron
2. The Committee: Josh Klein ’80, headmaster David Felsen, Frank Correll, Frank Lundy, Linda McConnell, David Niles ’82, and Linda Waxman Wasserman ’75
3. Dan Dolsky ’96, Richard Dolsky, Jordan Rubin ’98, Larry Rubin
4. Brad Bradbaer and Jon Harris
5. Paul Driscoll, Charles Champion, and Paul Clough ’82
6. Jesse Soslow ’02 and Myron Soslow
7. Josh Wasserman ’02, Kyle Baetty, Linda McConnell, and Ryan Pesin ’96
8. Linda Waxman Wasserman ’75, Rob Dubin, and friend
9. Start Your Engines!
PSOC Picnic

The PSOC (Parents of Students of Color) committee hosts a picnic each September at the start of the school year. The PSOC committee supports efforts to develop greater sensitivity and open communication within the School community.

1. Ballard Shelton, Terry Jones, Briana Folwell '13, Sierra Jones
2. Olivia Gillison '10, Doug Ross, Charlotte James '10, Alexa Dunnington '98, and Emily Pryor
3. Jesse Washington, David Felsen, Don and Jin Liu
4. Kate Schogol, Rob McCord, and Leigh Jackson
Tennis Night

The Home & School Association hosted its 10th Annual Tennis Night Out on March 18th at The Gulph Mills Racquet Club. Tennis players and spectators enjoyed a buffet dinner, wine tasting, silent auction, and massage therapy. They also received lessons from a tennis pro and played a lively series of singles and doubles matches.

Grandparents and Special Friends Day

In the spring of each year, fourth grade and Middle School students invite grandparents and special friends to school for a day. The visitors get a glimpse into life at FCS as they meet teachers, tour the campuses, and attend class with the children.

Pumpkin Fair

On Sunday, October 22nd, the Home & School Association hosted its annual Pumpkin Fair at the Lower School campus. The Lower School gym and parking lot were filled with old-fashioned arcade games, a juggler, food tents, crafts, pumpkins, and even a place to build your own scarecrow. The Upper School Jazz Band performed, and for the fearless, there was a haunted house in the basement. Proceeds from the event will be used to purchase a new kiln for the Lower School and to benefit the Lower School Discretionary Fund.

Plant Sale, Fair, and Peace Concert

Friends in the Garden is a group of parents, faculty, and friends who use their green thumbs to help maintain and improve the School’s gardens and arboreta. Each spring, they host a plant sale and fair at the Lower School. A “Concert for Peace” held the same day features Lower and Middle School students performing on the piano, flute, and violin.

From the President of the Alumni/ae Association

As the incoming President of the Alumni/ae Association, I am proud to serve both Friends' Central and my fellow alumni/ae. This position provides me with a great opportunity to assist with the growth of the School and the cultivation of one of its strongest assets, our many graduates. I also extend my sincere thanks to Matthew Levitties '86, our immediate past President, for his leadership and commitment over the past two years.

The Association already provides numerous ways for alumni/ae to give back to Friends' Central, whether through participation in special events, volunteer work, or financial contributions. I would like to further strengthen the relationship between Friends' Central and our alumni/ae base by providing additional means for our graduates to increase their involvement with the School. Therefore, I will be working closely with our Alumni/ae Board as well as the School to introduce several new programs which we believe will have a significant impact on how our alumni/ae can both give and receive.

One area where we can have an immediate impact is to increase the overall percentage of alumni that contribute to Annual Giving. Funds collected during Annual Giving are invaluable to the School as a foundation for current and future growth. For those most recent alumni, a most attainable goal is simply to begin the process of giving. It is not only easy to start, but also contagious. Why so habit forming? Because the results are as visible and gratifying as any contribution you will make. Come visit the School and you will see for yourself.

We are also pursuing the development of alumni/ae career networking and mentoring programs that would connect alumni with current students as well as other alumni/ae. Please stay tuned as we introduce these ideas over the coming months. I think that many who have contemplated a stronger relationship with the School will find an avenue for such connections through these programs. As always, please feel free to contact me or other members of the Board through the Alumni/ae Office with any ideas you may have to increase the effectiveness of the Association.

I look forward to speaking with and hearing from many of you as we strive collectively to encourage the further development of our Association and the positive impact we can have on life at Friends' Central.

Sincerely,

Andy Newcomb '87

Distinguished Alums

DISTINGUISHED ALUMNUS CITATION

WILLIAM CARSON
Friends' Central School—Class of 1941

Bill, we are deeply gratified to have you here with us today. Your life is a model of professional achievement combined with dedication to your community and to your alma mater. Your scientific research, loyalty to the School, volunteerism in your community, and devotion to family embody the values we cherish as an institution.

Bill, we are honored that you represent Friends' Central School and it is with sincere pleasure that we confer upon you the Friends' Central School Distinguished Alumnus Award.

DISTINGUISHED ALUMNA CITATION

MARJORIE MILLER HALLOWELL
Friends' Central School—Class of 1956

Marjorie, it is with deep pride that we claim you as an alumna.
Your commitment to the field of medicine is inspirational.
You excel at helping those in the medical profession improve and perfect their care for others.

Dedicated and loyal graduate, we are proud that your passion for your chosen field, your loyalty to the School and to your family, and your courage as a businesswoman were encouraged at Friends' Central School. It is with highest regard and great pleasure that we confer upon you the Friends' Central Distinguished Alumna Award.

Young Alumni/ae Open House

On Wednesday, November 22nd, members from the classes of 2003–2006 returned to Friends’ Central for the annual Young Alumni/ae Open House. Over sixty graduates gathered in the OPA Room to catch up with friends and to reminisce about their alma mater. What made the day a complete success was the number of faculty that greeted their former students. One teacher commented, “This really and truly is my favorite day of the whole year.”

Baby Day

This fall, Friends’ Central enjoyed catching up with graduates of all ages—and perhaps even a few future students! On October 22nd, the Alumni/ae Office hosted its annual Baby Day. The brunch was held in the Lower School library and offered alumni/ae and their young children a chance to greet old and new friends. Many of the graduates who returned spent their early years on the City Avenue campus, and they enjoyed seeing the “new” Lower School.

1 Jesseca Coplon ’87 with her son Slader Wilson, Emily Kaplan Dodge ’87 with her mother, Barbara Kaplan and son Oliver Dodge
2 Melanie McCarthy Frick ’94 with her son Michael Frick and mother R. Sandra McCarthy ’89
3 Sophie Meyers and Sydney Meyers, daughters of Kate Kasmer Meyers ’86
4 Debbie Miller and Alex Miller ’91 and their son Sam, Joy Clairmont ’91 and Max Kaufman ’91 with their son, Leo
5 Adrienne Levin Cantor ’92 and her son, Dylan, with Eric Rubin and Alimee Tavin Rubin ’92 and their children, Andrew and Will
Racers' Day

The Racers' Day luncheon on October 25th, honored graduates from the classes of 1956 or earlier. This event, too, offered some loyal members of the Friends' Central community a chance to see old friends, meet some new ones, and connect with the School. Many of the alums marveled at the physical changes the campus has undergone. They were greeted by current Friends' Central School students and entertained by the Upper School choral groups. Peter Seidel, Upper School art teacher, discussed the work of Hobson Pittman, former Upper School art teacher, and renowned oil painter. Everyone who attended these events enjoyed the strong sense of community they exemplified.

1 Sally Hooper Farrington '37 and Linda McConnell (Director of Girls' Athletics)

NOTES FROM FRIENDS

Former Faculty

Bob Emory writes: "So far so good! Best to all."

Casper J. Knight, III sent along the following note: "I am retiring this month after thirty-three years of teaching in private and public schools. My experience at FCS planted seeds in my professional development that aided my growth throughout my career—a wonderful experience!"

Alumni/ae

1930s

Margaret Baker Walker ’35 has moved to a senior living residence in Davis, California, to be near her daughter and granddaughter in Berkeley.

1940s

Joan Oberly Haviland ’42 is now living in Florida permanently.

Bitten Jensen Krentel ’46 is president of The Wallace Trust, a nonprofit organization that assists local landowners in obtaining conversion easements and serves as a sounding board for local open-space planning. She was featured in an article by the Reverend Elizabeth Eisenstadt-Evans in The Philadelphia Inquirer on May 16th, 2006.

James C. Pooley ’46 writes that he is well and enjoying life. He is still selling real estate in Washington state and has been married for four years to Bonnie.

Virginia Keim Cole ’48 writes: "We are in our forty-second year living in the Fairfax County area of Virginia. Prior to settling here, my husband and five children and I were with the U.S. Marine Corps."

Gayle Waldhauser Martin ’42 writes: "There’s a new baby at our house! Her name is Mini and she’s bright blue with white racing stripes on her bonnet. Her full name is Mini Cooper and they say she can do 150 mph, but I’m not about to test it out! She’s fun to drive even though stick shift takes a bit of getting used to after years of automatic. And Mini is all mine! Our son, Todd, back from Australia and daughter, Robin, from California, joined us for Thanksgiving."

1950s

Carol Weinrott Leebro ’50 reports that her son, David W. Leebro, is the seventh President of Rice University in Houston, TX.

Fay Wise Smith ’51 writes: "Our adopted son, Eric, died suddenly and unexpectedly on October 29th, 2005 at age forty-two from a liver disease he had been battling for years. Life without him is unbelievably sad. Our daughter, Karen, is in environmental science in Corpus Christi, and is going for her master's degree."

Jacqueline Watkins Slifka ’52 is president of the Association of Residential Boards in New York City and has two grandchildren Grace, 11, and Josh, 8. She writes: "There is not any doubt that my most carefree days were spent at FCS."

Philippa C. Whale ’53 retired in September 2005 from thirty years as Professor of Drama Studies and French Language and Culture at Purchase College, SUNY. She enjoys writing, translating, and traveling to France.

Virginia Lundgren Bortin ’54 writes: "I was saddened to hear of Berenice Woerner's death. As teacher and friend, she was one of the most important intellectual influences in my years at Friends' Central. I will remember her with fondness always."

Edward V. Clishby ’55 had a mini-reunion in Venice, Florida with Middler Minster Larson ’55, Dan Egan ’55, and Allan Maclean ’58 for the vaudeville show of Joey Guy.

Susan L. Kaufmann ’56 writes that she had a wonderful weekend at the 50th Class Reunion. "Friends' Central is a continuing gift to my life. Thanks for everything!"

Margot A. McKeel ’56 writes: "I am living in Westtown in the house in which I grew up and where we had my graduation party. I am an associate broker with Weichert Realtors, West Chester office. I have recently seen Peg Roach Nagy ’55 and John Nagy ’56 and Ann Whitcraft."

Ann Dothard Walters ’58 writes: "Visiting us this past week and every year for many years was Frank (Mickey) Milhous, Jr ’60 and his wife, Clare. They were down here in Naples to attend the ACE Group Classic Champions Tour golf tournament."

Carolyn Dustin Houghton ’59 writes: "I am moving forward in life as a divorced woman. Independence is wonderful! So are family and close friends."

Tim Patterson ’59 and Betsy Markland Schwartz ’59 recently saw each other in Guatemala. Tim was there with his church and Betsy was visiting her granddaughter. Again, hard to stay away from those grandkids! Although their destinations were four hours apart, they were able to coordinate their travel plans to say hello.

Elizabeth Mackey Smith ’59 writes: "My husband, George, is in his fourth year of living with ALS (Lou Gehrig’s disease). We hear Philadelphia is a great area for awareness and funding. Pass it on...we need to find the cause and cure."

1960s

C. Ladd Thomas ’60 writes: "Waiting for Robert Levin ’60 to publish his book."

Noel Sharpless Wittenberg ’61 is sorry that she was unable to join the Class of 1961 for their 45th reunion, but she was in Hawaii. She sends her best to everyone. Her youngest, Krista, was married on March 31st.

Sara Clark Linder ’62 is sad to announce the passing of her mother Esther Wilson Clark ’30 on March 27th, 2006. "I am very blessed to live the best of lives in the Florida Keys and the Finger Lakes with Chuck, two children, and six grandchildren."

Hans J. Moosauer ’63 has retired from a German air transport company. He now flies a Challenger—604 for an air executive with most of the flights worldwide out of Moscow.

Charles A. Hunter, Jr. ’64 has returned to the Philadelphia area. He is in the commercial real estate department of a regional bank.

Writers’ Journal Books/Val-Tech Media has published "Win! Poetry Contest" by Esther Leiper Estabrooks ’65.

Katherine Tucker, daughter of Judith Seltzer Tucker ’65, is a junior at Georgetown and spent the spring semester in Paris.

DIRECTIONS Fall 2006/Winter 2007 71
1970s
Charles W. Gregory ’70 wrote through the website: “I’m starting a new publishing company called CWG Press. I hope to have ten books in print by the end of 2007. The first, The American Dream, by Mike Palecek, will be released in February. My e-mail address is available on the FCS site and I’d love to hear from any of you.”
Lisa Reischer Payton ’72 is Director of Client Services for William Berenson Brand Architects, an international branding and communications firm. She lives in Miami with her husband and twin daughters. Lisa maintains her friendship with Mindy Felinton ’72 and Nina Mishkin Rothstein ’72.
Kirk J. Paul ’75 writes: “I have become engaged to my date at our 30th reunion, Linda Huff. We have not set a date yet. Also, in September, I will be performing in a production of Shakespeare’s The Winter’s Tale for Exclamation Theater in Philadelphia, and in February/March 2007, I will be directing a production of Never Too Late, by Sumner Long at Footlighters Theater in Berwyn, PA.”
Susan Myers Hinrichs ’76 writes: “Couldn’t make reunion, live in California and my boys have a swim meet! Life is great. I still love sports… but my boys are faster than me in everything.”
Laura Bolt Heuer ’78 is currently staying busy as the mom of Max (five) and Sam (three). She would love to hear from friends at labhi@zoomtown.com.
Karen D. Palcho ’78 writes: “My business, Karen’s Botanicals, is doing very well. The move from being an educator to being an entrepreneur has been a thrill! I have just returned from Israel and Slovakia on a work related trip as I continue to learn and grow through travel.”
Rebecca Moberg Roter ’78 writes: “Moving to Bucks County last year made it possible for my daughter Rachel to finally attend a Quaker school. She is getting ready to finish her first year at Abington Friends as an eighth grade graduate.”
In the spring, Stacey Goldsborough Snider ’78 was named CEO and Co-Chairman of DreamWorks SKG.
Jeannette McCabe Harris ’79 writes: “I’ve been in San Francisco for twenty-three years and love it. Married to a Californian, we have two girls: Gigi who is ten and Jacqueline who is two. My career as a senior VP and portfolio manager for Morgan Stanley is looming on ten years!”
Sarah, youngest daughter of Michael Rothman ’79, became a Bat Mitzvah.
1980s
Amy Birenbaum Fosco ’82 lives in Broomall, PA with her husband Ed and daughters Nichole, four, and Renee, two. Before the girls were born, Amy was a probation officer in the Philadelphia Court System.
Laura Meloney Dugan ’86 writes: “The 20th reunion provided us a great opportunity to renew our enthusiasm for old friendships. EVERYONE looked fantastic, if not better, after all of these years. Thanks to everyone for coming back… your children are beautiful and y’all were wonderful to see!”
Stephen L. Kay ’87 has been appointed president of The Security Traders Association of New York.
Mark G. Levy ’87 has relocated to Washington, D.C. with his family, including his three children, Joshua, Skye, and Raine. He is regional vice president for Prologis, a real estate investment trust and is involved with several charitable and professional organizations: State of Israel Bonds, United Jewish Appeal, National Association of Real Estate Investment Trusts, and the National Association of Industrial and Office Properties.
Paul Pazy Mino ’87 writes: “Chris Dick’s ’87 wedding to Kate Smucker was beautiful! Even though it was December in Massachusetts. The weather was wonderfully warm and the meeting and wedding took place outside. There was a mini-reunion of FCS people including: Stefan Treatman ’87, Mo Lotman ’87, Jon Dick ’85, and John Stein ’87. Personally, I am headed to Hawaii some time in the next few weeks to get married on the beach to Susan Chiang, an environmental health advocate originally from Connecticut. Also, my sister, Andrea Carty ’88, just had her third child, Alex Carty.”
Dawn Skwersky Schakett ’87 writes: “I had a baby on July 12th, 2006, Gabriella Brooke Schakett. She joins my stepdaughter Sara, and husband David, and three dogs. I work for ADP in Alpharetta, GA as an application developer. Also, visit www.myspace.com/wordofhand to see videos I made of Gabriella.”
“The City Reexamined,” an exhibition of the art of Sonya Sklaroff ’88 was on view at the David Findlay gallery in New York this past May.

Jessica Kurtz Eribaum ’89 writes: “I live in Merion with my husband Jon and our three sons—Akiva (five), Dov (three), and Yoncun (three). We run a Jewish Young Professionals organization.”
Jeremy Treatman ’83 is a sportscaster for CN8 and runs sportscasting camps for children in eight cities. His Scholastic Play-by-Play Network produces and promotes high school basketball tournaments nationwide, many appearing on television.
Elizabeth Toborowsky Pollard ’87 writes: “Mark and I are enjoying living in Marlton, NJ after being away from the Philadelphia area for nearly ten years! Matthew will be three in March and Ryan is almost six months old! I’m looking forward to seeing all of our classmates at our 20th reunion!”
1990s
Douglas C. Smith ’90 was home from Mongolia, where he is with the Peace Corps, at Christmas. He writes: “The trip back to America was just the push I needed to start fresh again. I continue to remain very busy at work, in my social life, and in my travels.” He posts pictures at: www.geocities.com/dougmishtmongolia/contact.html.
Amy Feldman Chmar ’91 and her husband Michael welcomed a baby boy, Gabriel Henry, on April 28th, 2006. Proud big sister is Deborah (Evie) Pearl.
Beth Haviva Steinberg ’94 writes: “I had the pleasure of attending the wedding of Lauren Bishop Campuzano ’94 this past June. It’s great when we can still be a part of each other’s lives after all this time. Congrats, Lauren!”

Daniel Colon ’96 writes that he has been awarded a Fulbright U.S. Student Scholarship to Chile in Latin American and Brazilian Literature. “Also, I was not able to attend my tenth reunion this past spring because I am happy to announce that my wife, Lilia, and I had our first baby: Gabriela Elena Colon, May 10th, 2006, 6 lbs., 10 ounces, 19.75 inches.”

Heike Zulla ’96 writes: “Thanks to Grant Calder, I was able to spend one year at FCS (94–95). During the American Literature class we read so many classics that it helped me later with my university studies. It was a challenging, but also rewarding and fun year. Thank you to everyone who made it happen.”

Philadelphia Magazine reports that Brad Messinger ’97 has two coffee shops in the city (130 South 17th Street and 922 Walnut Street) noted for their gluten free or sugar waffles.

Patrick Dostal ’98 writes: “I just finished my first year at Mount Sinai Medical School. Over the summer I will be learning Spanish in La Ceiba, Honduras, and Valladolid, Spain.”

Robyn Polykoff ’99 writes that she enjoys seeing former classmate, Brennan Hesser ’99, on VH1 in “So Notorious” with Tori Spelling.

2000s

E.J. Klock-McCook ’00 received his B.S (Cum Laude) in Mechanical Engineering from Villanova University (2004). He received an M.S. in Mechanical Engineering from the University of Washington in Seattle (2005). Currently he is working for Lockheed-Martin in Newtown, Bucks County, doing research on communications satellites. During the summer he races with the Human Zoom Bike racing club, and during the winter he skis, primarily in the Northwest United States and British Columbia. In March 2006, he spent three months skiing the U.S. and Canadian Rockies.

Frances Kreimer ’01 is working in Cairo, Egypt for the refugee organization Africa and Middle East Refugee Assistance (www.amera-uk.org).

Bettina Moore, Lower School teacher from 1945–1969, as she leaves for Europe in 1955 to administer Friends’ Central’s affiliation with the Centra-Educativo Italo-Svizzero, an elementary school in Rimini, Italy. Moore spearheaded the affiliation between the two schools which still exists today. She holds “Rimi,” a puppet she took with her on her travels to help bridge the gap between the American and Italian schoolchildren. “Rimi” is on display in Lower School principal Joe Ludwig’s office.
Yesterday Today Tomorrow

Times have changed . . .

at Friends’ Central School

but the strong academic program and Quaker values prevail. Your gift to the Annual Giving Campaign helps to sustain and support a very special place.

You can give safely and quickly at www.friendscentral.org/gift
Visit Friends' Central From Home!

Starting in mid-December, 2006, you can expect several improvements to your online Friends' Central experience.
